

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 1. Week ending SATURDAY, JANUARY 10, 1925 Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 10th January 1925 the births of 1133 living children, the deaths of 822 persons, and 704 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 803. The equivalent annual birth-rate is 24·5 per thousand, the marriage-rate 15·2, and the death-rate corrected 17·3.

The birth-rate for the week is 4·6 above that for the previous week, 4·8 above the mean of the rates for the three preceding weeks, and 0·9 above that for the corresponding week of last year. The marriage-rate for the week is 14·3 below that for the previous week, the same as the mean of the rates for the three preceding weeks, and 8·3 above that for the corresponding week of last year. The death-rate for the week is 0·3 above that for the previous week, 1·0 above the mean of the rates for the three preceding weeks, and the same as that for the corresponding week of last year.

In the individual towns the death-rate ranged from 26·7 in Dundee, 19·7 in Ayr, and 19·4 in Hamilton, to 6·5 in Clydebank, 7·5 in Dunfermline, and 12·1 in Falkirk. In Paisley it was 19·1, in Aberdeen 18·3, in Coatbridge 17·3, in Glasgow 17·2, in Perth 17·2, in Kilmarnock 17·1, in Edinburgh 16·8, in Motherwell and Wishaw 16·7, in Kirkcaldy 12·9, and in Greenock 12·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 82. They are 8 more than in the previous week, and are equal to an annual death-rate from these causes of 1·8 per thousand. These deaths include 2 from enteric fever, 21 from measles, 2 from scarlet fever, 36 from whooping-cough, 13 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 6 more, from the diarrhoeas of childhood 4 more, from measles 2 more, from enteric fever 1 more, and from whooping-cough 1 more, but those from scarlet fever are 6 fewer.

Deaths from influenza numbered 25. They are 5 more than in the previous week, and 3 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 161. They are 10 fewer than in the previous week, but 4 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 135, and those of persons of sixty-five and upwards 275. The former are 5 fewer than in the previous week, and the latter are 33 more than in that week.

Deaths attributed to violent causes numbered 23. They are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·0, being 1°·2 above that for the previous week, and 5°·8 above that for the corresponding week of last year. The mean rainfall was 0·50 inch

Note :—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 2      Week ending SATURDAY, JANUARY 17, 1925      Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 17th January 1925 the births of 1036 living children, the deaths of 743 persons, and 209 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 733. The equivalent annual birth-rate is 22·4 per thousand, the marriage-rate 4·5, and the death-rate corrected 15·8.

The birth-rate for the week is 2·1 below that for the previous week, and 1·7 below that for the corresponding week of last year, but 1·3 above the mean of the rates for the three preceding weeks. The marriage-rate for the week is 10·7 below that for the previous week, 13·8 below the mean of the rates for the three preceding weeks, and 0·1 below that for the corresponding week of last year. The death-rate for the week is 1·5 below that for the previous week, 0·9 below the mean of the rates for the three preceding weeks, and 1·8 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 28·2 in Dundee, 23·3 in Greenock, and 21·9 in Coatbridge, to 7·8 in Perth, 9·9 in Ayr, and 10·2 in Motherwell and Wishaw. In Hamilton it was 18·1, in Kilmarnock 17·1, in Aberdeen 16·1, in Paisley 15·5, in Clydebank 15·1, in Glasgow 14·8, in Edinburgh 13·9, in Dunfermline 13·7, in Falkirk 12·1, and in Kirkcaldy 11·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 76. They are 6 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·6 per thousand. These deaths include none from enteric fever, 17 from measles, 4 from scarlet fever, 40 from whooping-cough, 6 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 4 more, from scarlet fever 2 more, and from the diarrhoeas of childhood 1 more, but those from measles are 4 fewer, and from diphtheria 7 fewer.

Deaths from influenza numbered 26. They are 1 more than in the previous week, and 3 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 147. They are 14 fewer than in the previous week, and 17 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 118, and those of persons of sixty-five and upwards 215. The former are 17 fewer than in the previous week, and the latter are 60 fewer than in that week.

Deaths attributed to violent causes numbered 25. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·4, being 4°·4 above that for the previous week, and 6°·5 above that for the corresponding week of last year. The mean rainfall was 0·41 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 3. Week ending SATURDAY, JANUARY 24, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 24th January 1925 the births of 1005 living children, the deaths of 782 persons, and 217 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 751. The equivalent annual birth-rate is 21·7 per thousand, the marriage-rate 4·7, and the death-rate corrected 16·2.

The birth-rate for the week is 0·7 below that for the previous week, 0·6 below the mean of the rates for the three preceding weeks, and 2·4 below that for the corresponding week of last year. The marriage-rate for the week is 0·2 above that for the previous week, 11·7 below the mean of the rates for the three preceding weeks, and 0·6 below that for the corresponding week of last year. The death-rate for the week is 0·4 above that for the previous week, but 0·5 below the mean of the rates for the three preceding weeks, and 1·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 29·9 in Kilmarnock, 23·1 in Dundee and 22·7 in Greenock, to 4·3 in Clydebank, 8·7 in Dunfermline and 9·1 in Falkirk. In Coatbridge it was 21·9, in Perth 18·8, in Aberdeen 17·0, in Edinburgh 16·8, in Kirkcaldy 16·8, in Ayr 15·5, in Glasgow 15·2, in Paisley 14·3, in Hamilton 12·9, and in Motherwell and Wishaw 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 63. They are 13 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include none from enteric fever, 13 from measles, 1 from scarlet fever, 34 from whooping-cough, 8 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 2 more, but those from the diarrhoeas of childhood are 2 fewer, from scarlet fever 3 fewer, from measles 4 fewer, and from whooping-cough 6 fewer.

Deaths from influenza numbered 16. They are 10 fewer than in the previous week, and 8 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 141. They are 6 fewer than in the previous week, and 19 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 122, and those of persons of sixty-five and upwards 234. The former are 4 more than in the previous week, and the latter are 19 more than in that week.

Deaths attributed to violent causes numbered 29. They are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·8, being 3°·6 below that for the previous week, and 1°·8 below that for the corresponding week of last year. The mean rainfall was 0·36 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 4. Week ending SATURDAY, JANUARY 31, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 31st January 1925 the births of 941 living children, the deaths of 788 persons, and 219 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 753. The equivalent annual birth-rate is 20·3 per thousand, the marriage-rate 4·7, and the death-rate corrected 16·3.

The birth-rate for the week is 1·4 below that for the previous week, 2·6 below the mean of the rates for the three preceding weeks, and 3·3 below that for the corresponding week of last year. The marriage-rate for the week is the same as that for the previous week, 3·4 below the mean of the rates for the three preceding weeks, and 1·5 below that for the corresponding week of last year. The death-rate for the week is 0·1 above that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, and 0·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 28·5 in Kilmarneock, 24·3 in Dundee and 17·7 in Greenock, to 9·7 in Clydebank, 10·0 in Dunfermline and 11·3 in Ayr. In Coatbridge it was 17·3, in Perth 17·2, in Glasgow 16·8, in Paisley 16·7, in Motherwell and Wishaw 15·3, in Falkirk 15·2, in Edinburgh 14·3, in Kirkcaldy 12·9, in Aberdeen 12·5, and in Hamilton 11·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 83. They are 20 more than in the previous week, and are equal to an annual death-rate from these causes of 1·8 per thousand. These deaths include none from enteric fever, 11 from measles, 10 from scarlet fever, 44 from whooping-cough, 12 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 10 more, from scarlet fever 9 more, and from diphtheria 4 more, while those from the diarrhoeas of childhood are 1 fewer, and from measles 2 fewer.

Deaths from influenza numbered 18. They are 2 more than in the previous week, but 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 123. They are 18 fewer than in the previous week, and 27 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 126, and those of persons of sixty-five and upwards 246. The former are 4 more than in the previous week, and the latter are 12 more than in that week.

Deaths attributed to violent causes numbered 19. They are 10 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·0, being 0°·8 below that for the previous week, and 3°·5 below that for the corresponding week of last year. The mean rainfall was 1·10 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF

## SCOTLAND.

By Authority of the Registrar-General.

---

**No. 5. Week ending SATURDAY, FEBRUARY 7, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 7th February 1925 the births of 1021 living children, the deaths of 742 persons, and 281 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 692. The equivalent annual birth-rate is 22·0 per thousand, the marriage-rate 6·1, and the death-rate corrected 14·9.

The birth-rate for the week is 1·7 above that for the previous week, and 0·5 above the mean of the rates for the three preceding weeks, but 3·3 below that for the corresponding week of last year. The marriage-rate for the week is 1·4 above that for the previous week, 1·5 above the mean of the rates for the three preceding weeks, and 0·5 above that for the corresponding week of last year. The death-rate for the week is 1·4 below that for the previous week, 1·2 below the mean of the rates for the three preceding weeks, and 3·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·3 in Dundee, 20·8 in Greenock, and 18·7 in Dunfermline, to 6·1 in Falkirk, 7·1 in Kilmarnock, and 8·4 in Paisley. In Kirkcaldy it was 16·8, in Edinburgh 15·9, in Clydebank 15·1, in Coatbridge 15·0, in Glasgow 14·7, in Motherwell and Wishaw 14·5, in Perth 14·1, in Hamilton 12·9, in Ayr 12·7, and in Aberdeen 11·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 55. They are 28 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 1 from enteric fever, 7 from measles, 9 from scarlet fever, 26 from whooping-cough, 9 from diphtheria, and 3 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from enteric fever are 1 more, but those from scarlet fever are 1 fewer, from diphtheria 3 fewer, from the diarrhoeas of childhood 3 fewer, from measles 4 fewer, and from whooping-cough 18 fewer.

Deaths from influenza numbered 16. They are 2 fewer than in the previous week, and 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 135. They are 12 more than in the previous week, but 2 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 109, and those of persons of sixty-five and upwards 235. The former are 17 fewer than in the previous week, and the latter are 11 fewer than in that week.

Deaths attributed to violent causes numbered 23. They are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·9, being 0°·9 above that for the previous week, but 3°·2 below that for the corresponding week of last year. The mean rainfall was 0·73 inch.

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 6. Week ending SATURDAY, FEBRUARY 14, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 14th February 1925 the births of 1006 living children, the deaths of 774 persons, and 256 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 767. The equivalent annual birth-rate is 21·7 per thousand, the marriage-rate 5·5, and the death-rate corrected 16·6.

The birth-rate for the week is 0·3 below that for the previous week, and 3·3 below that for the corresponding week of last year, but 0·4 above the mean of the rates for the three preceding weeks. The marriage-rate for the week is 0·6 below that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, and 1·3 above that for the corresponding week of last year. The death-rate for the week is 1·7 above that for the previous week, 0·8 above the mean of the rates for the three preceding weeks, but 0·8 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·2 in Dundee, 20·2 in Greenock, and 18·1 in Edinburgh, to 7·7 in Hamilton, 8·5 in Kilmarnock, and 8·5 in Ayr. In Glasgow it was 17·0, in Aberdeen 16·4, in Perth 15·6, in Motherwell and Wishaw 15·3, in Coatbridge 15·0, in Paisley 13·1, in Kirkcaldy 11·6, in Dunfermline 11·2, in Clydebank 10·8, and in Falkirk 10·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 71. They are 16 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include none from enteric fever, 15 from measles, 5 from scarlet fever, 31 from whooping-cough, 13 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 8 more, from whooping-cough 5 more, from diphtheria 4 more, and from the diarrhoeas of childhood 4 more, but those from scarlet fever are 4 fewer.

Deaths from influenza numbered 17. They are 1 more than in the previous week, and the same as the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 141. They are 6 more than in the previous week, and 8 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 117, and those of persons of sixty-five and upwards 251. The former are 8 more than in the previous week, and the latter are 16 more than in that week.

Deaths attributed to violent causes numbered 39. They are 16 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·2, being 1°·7 below that for the previous week, but 2°·8 above that for the corresponding week of last year. The mean rainfall was 1·32 inch.

OF

## BIRTHS, DEATHS, & MARRIAGES

### IN THE PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

---

No 7.    Week ending SATURDAY, FEBRUARY 21, 1925.    Price 2d. net.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 21st February 1925 the births of 1104 living children, the deaths of 735 persons, and 245 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 711. The equivalent annual birth-rate is 23·8 per thousand, the marriage-rate 5·3, and the death-rate corrected 15·4.

The birth-rate for the week is 2·1 above that for the previous week, 2·5 above the mean of the rates for the three preceding weeks, but 0·9 below that for the corresponding week of last year. The marriage-rate for the week is 0·2 below that for the previous week, and 0·1 below the mean of the rates for the three preceding weeks, but the same as that for the corresponding week of last year. The death-rate for the week is 1·2 below that for the previous week, 0·5 below the mean of the rates for the three preceding weeks, and 4·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 27·0 in Kilmarnock, 19·9 in Edinburgh, and 18·7 in Aberdeen, to 7·3 in Motherwell and Wishaw, 7·6 in Clydebank, and 8·4 in Paisley. In Dundee it was 18·5, in Dunfermline 17·4, in Greenock 16·4, in Ayr 15·5, in Falkirk 15·2, in Kirkcaldy 14·2, in Glasgow 13·8, in Coatbridge 13·8, in Hamilton 12·9, and in Perth 11·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 58. They are 13 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·3 per thousand. These deaths include none from enteric fever, 5 from measles, 3 from scarlet fever, 30 from whooping-cough, 13 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 1 fewer, from scarlet fever 2 fewer, and from measles 10 fewer, while those from diphtheria and from the diarrhoeas of childhood each number the same.

Deaths from influenza numbered 19. They are 2 more than in the previous week, and 2 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 132. They are 9 fewer than in the previous week, and 1 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 103, and those of persons of sixty-five and upwards 235. The former are 14 fewer than in the previous week, and the latter are 16 fewer than in that week.

Deaths attributed to violent causes numbered 22. They are 17 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 38°·8, being 0°·4 below that for the previous week, and 1°·1 below that for the corresponding week of last year. The mean rainfall was 0·43 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

---

No. 8. Week ending SATURDAY, FEBRUARY 28, 1925. Price 2d. net.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 28th February 1925 the births of 1071 living children, the deaths of 789 persons, and 311 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 766. The equivalent annual birth-rate is 23·1 per thousand, the marriage-rate 6·7, and the death-rate corrected 16·5.

The birth-rate for the week is 0·7 below that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, but 0·1 above that for the corresponding week of last year. The marriage-rate for the week is 1·4 above that for the previous week, and 1·1 above the mean of the rates for the three preceding weeks, but is the same as that for the corresponding week of last year. The death-rate for the week is 1·1 above that for the previous week, 0·9 above the mean of the rates for the three preceding weeks, but 4·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·8 in Kilmarnock, 22·0 in Kirkealdy, and 21·9 in Dundee, to 10·0 in Dunfermline, 13·7 in Paisley, and 13·8 in Coatbridge. In Perth it was 20·3, in Hamilton 19·4, in Edinburgh 18·4, in Motherwell and Wishaw 16·0, in Glasgow 15·7, in Falkirk 15·2, in Greenock 14·5, in Aberdeen 14·1, in Clydebank 14·1, and in Ayr 14·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 78. They are 20 more than in the previous week, and are equal to an annual death-rate from these causes of 1·7 per thousand. These deaths include none from enteric fever, 16 from measles, 8 from scarlet fever, 41 from whooping-cough, 5 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 11 more, from whooping-cough 11 more, from scarlet fever 5 more, and from the diarrhoeas of childhood 1 more, but those from diphtheria are 8 fewer.

Deaths from influenza numbered 12. They are 7 fewer than in the previous week, and 5 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 141. They are 9 more than in the previous week, and 5 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 131, and those of persons of sixty-five and upwards 260. The former are 28 more than in the previous week, and the latter are 25 more than in that week.

Deaths attributed to violent causes numbered 20. They are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 38°·1, being 0°·7 below that for the previous week, but 1°·2 above that for the corresponding week of last year. The mean rainfall was 1·27 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

---

No. 9.      Week ending SATURDAY, MARCH 7, 1925.      Price 2d. net.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 7th March 1925 the births of 1050 living children, the deaths of 728 persons, and 355 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 701. The equivalent annual birth-rate is 22·7 per thousand, the marriage-rate 7·7, and the death-rate corrected 15·1.

The birth-rate for the week is 0·4 below that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, and 0·2 below that for the corresponding week of last year. The marriage-rate for the week is 1·0 above that for the previous week, 1·9 above the mean of the rates for the three preceding weeks, but 0·4 below that for the corresponding week of last year. The death-rate for the week is 1·4 below that for the previous week, 1·1 below the mean of the rates for the three preceding weeks, and 8·8 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 25·6 in Kilmarneock, 22·8 in Falkirk, and 19·1 in Paisley, to 9·0 in Kirkcaldy, 10·0 in Dunfermline, and 10·8 in Clydebank. In Hamilton it was 18·1, in Coatbridge 17·3, in Ayr 16·9, in Aberdeen 16·4, in Perth 15·6, in Edinburgh 15·3, in Glasgow 15·1, in Dundee 12·8, in Motherwell and Wishaw 12·3, and in Greenock 12·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 70. They are 8 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include none from enteric fever, 10 from measles, 5 from scarlet fever, 35 from whooping cough, 14 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 9 more, but those from the diarrhoeas of childhood are 2 fewer, from scarlet fever 3 fewer, from measles 6 fewer, and from whooping-cough 6 fewer.

Deaths from influenza numbered 9. They are 3 fewer than in the previous week, and 7 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 137. They are 4 fewer than in the previous week, and 1 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 119, and those of persons of sixty-five and upwards 210. The former are 12 fewer than in the previous week, and the latter are 50 fewer than in that week.

Deaths attributed to violent causes numbered 22. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·4, being 2°·3 above that for the previous week, and 5°·8 above that for the corresponding week of last year. The mean rainfall was 0·11 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 10. Week ending SATURDAY, MARCH 14, 1925. Price 2d. net

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 14th March 1925 the births of 1006 living children, the deaths of 769 persons, and 267 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 741. The equivalent annual birth-rate is 21·7 per thousand, the marriage-rate 5·8, and the death-rate corrected 16·0.

The birth-rate for the week is 1·0 below that for the previous week, 1·5 below the mean of the rates for the three preceding weeks, and 2·5 below that for the corresponding week of last year. The marriage-rate for the week is 1·9 below that for the previous week, and 0·8 below the mean of the rates for the three preceding weeks, but 0·3 above that for the corresponding week of last year. The death-rate for the week is 0·9 above that for the previous week, and 0·3 above the mean of the rates for the three preceding weeks, but 8·8 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·8 in Coatbridge, 20·3 in Perth, and 19·6 in Edinburgh, to 3·9 in Kirkcaldy, 7·0 in Ayr, and 7·6 in Clydebank. In Dundee it was 17·6, in Aberdeen 17·4, in Motherwell and Wishaw 16·7, in Greenock 16·4, in Glasgow 15·6, in Falkirk 15·2, in Paisley 14·9, in Dunfermline 12·5, in Kilmarnock 10·0, and in Hamilton 7·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 62. They are 8 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·3 per thousand. These deaths include none from enteric fever, 9 from measles, 11 from scarlet fever, 24 from whooping-cough, 13 from diphtheria, and 5 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 6 more, but those from measles are 1 fewer, from diphtheria 1 fewer, from the diarrhoeas of childhood 1 fewer, and from whooping-cough 11 fewer.

Deaths from influenza numbered 24. They are 15 more than in the previous week, and 11 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 125. They are 12 fewer than in the previous week, and 12 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 101, and those of persons of sixty-five and upwards 251. The former are 18 fewer than in the previous week, and the latter are 41 more than in that week.

Deaths attributed to violent causes numbered 14. They are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·7, being 2°·9 below that for the previous week, and 4°·3 below that for the corresponding week of last year. The mean rainfall was 0·26 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 11. Week ending SATURDAY, MARCH 21, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 21st March 1925 the births of 1064 living children, the deaths of 757 persons, and 189 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 736. The equivalent annual birth-rate is 23·0 per thousand, the marriage-rate 4·1, and the death-rate corrected 15·9.

The birth-rate for the week is 1·3 above that for the previous week, 0·5 above the mean of the rates for the three preceding weeks, but 1·0 below that for the corresponding week of last year. The marriage-rate for the week is 1·7 below that for the previous week, 2·6 below the mean of the rates for the three preceding weeks, and 0·5 below that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, and 7·8 below that for the corresponding week of last year, but is the same as the mean of the rates for the three preceding weeks.

In the individual towns the death-rate ranged from 22·2 in Dundee, 18·2 in Edinburgh, and 18·1 in Kirkcaldy, to 7·5 in Dunfermline, 8·5 in Ayr, and 8·6 in Clydebank. In Aberdeen it was 17·4, in Glasgow 15·7, in Hamilton 15·5, in Paisley 14·9, in Kilmarnock 14·2, in Falkirk 13·7, in Greenock 12·6, in Coatbridge 11·5, in Perth 11·0, and in Motherwell and Wishaw 10·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 69. They are 7 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include 2 from enteric fever, 8 from measles, 6 from scarlet fever, 36 from whooping-cough, 10 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 12 more, from enteric fever 2 more, and from the diarrhoeas of childhood 2 more, but those from measles are 1 fewer, from diphtheria 3 fewer, and from scarlet fever 5 fewer.

Deaths from influenza numbered 10. They are 14 fewer than in the previous week, and 5 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 120. They are 5 fewer than in the previous week, and 14 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 119, and those of persons of sixty-five and upwards 238. The former are 18 more than in the previous week, and the latter are 13 fewer than in that week.

Deaths attributed to violent causes numbered 23. They are 9 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·2, being 6°·5 above that for the previous week, and 7°·5 above that for the corresponding week of last year. The mean rainfall was 0·16 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 12. Week ending SATURDAY, MARCH 28, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 28th March 1925 the births of 1052 living children, the deaths of 684 persons, and 301 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 661. The equivalent annual birth-rate is 22·7 per thousand, the marriage-rate 6·5, and the death-rate corrected 14·3.

The birth-rate for the week is 0·3 below that for the previous week, and 2·3 below that for the corresponding week of last year, but is 0·2 above the mean of the rates for the three preceding weeks. The marriage-rate for the week is 2·4 above that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, and 0·9 above that for the corresponding week of last year. The death-rate for the week is 1·6 below that for the previous week, 1·4 below the mean of the rates for the three preceding weeks, and 7·4 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·8 in Kilmarnock, 22·0 in Kirkcaldy and 20·3 in Paisley, to 10·3 in Hamilton, 11·0 in Perth, and 12·0 in Greenock. In Coatbridge it was 16·1, in Motherwell and Wishaw 16·0, in Ayr 15·5, in Dunfermline 14·9, in Aberdeen 14·7, in Glasgow 14·3, in Clydebank 14·1, in Dundee 12·8, in Edinburgh 12·6, and in Falkirk 12·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 58. They are 11 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·3 per thousand. These deaths include none from enteric fever, 6 from measles, 4 from scarlet fever, 32 from whooping-cough, 9 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 4 fewer, from measles 2 fewer, from scarlet fever 2 fewer, and from diphtheria 1 fewer, while those from the diarrhoeas of childhood numbered the same.

Deaths from influenza numbered 10. They are the same as in the previous week, but 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 128. They are 8 more than in the previous week, and 1 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 114, and those of persons of sixty-five and upwards 199. The former are 5 fewer than in the previous week, and the latter are 39 fewer than in that week.

Deaths attributed to violent causes numbered 31. They are 8 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·0, being 4°·2 below that for the previous week, but 1°·5 above that for the corresponding week of last year. The mean rainfall was 0·21 inch.

## WEEKLY RETURN

OR

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 13. Week ending SATURDAY, APRIL 4, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 4th April 1925 the births of 1071 living children, the deaths of 713 persons, and 304 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 678. The equivalent annual birth-rate is 23·1 per thousand, the marriage-rate 6·6, and the death-rate corrected 14·6.

The birth-rate for the week is 0·4 above that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, and 0·7 above that for the corresponding week of last year. The marriage-rate for the week is 0·1 above that for the previous week, 1·1 above the mean of the rates for the three preceding weeks, but 0·3 below that for the corresponding week of last year. The death-rate for the week is 0·3 above that for the previous week, but 0·8 below the mean of the rates for the three preceding weeks, and 6·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·7 in Aberdeen, 17·4 in Motherwell and Wishaw, and 16·2 in Edinburgh, to 5·4 in Clydebank, 6·5 in Hamilton, and 6·9 in Coatbridge. In Ayr it was 15·5, in Glasgow 15·4, in Greenock 14·5, in Dundee 14·0, in Falkirk 13·7, in Kirkcaldy 11·6, in Paisley 11·4, in Kilmarnock 10·0, in Dunfermline 8·7, and in Perth 7·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 67. They are 9 more than in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include 1 from enteric fever, 9 from measles, 6 from scarlet fever, 36 from whooping-cough, 8 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 4 more, from measles 3 more, from scarlet fever 2 more, and from enteric fever 1 more, but those from the diarrhoeas of childhood number the same, while those from diphtheria are 1 fewer. The two deaths from measles in Glasgow are the first recorded for that town since the week ending September 13th of last year.

Deaths from influenza numbered 6. They are 4 fewer than in the previous week, and 9 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 105. They are 23 fewer than in the previous week, and 19 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 101, and those of persons of sixty-five and upwards 208. The former are 13 fewer than in the previous week, and the latter are 9 more than in that week.

Deaths attributed to violent causes numbered 15. They are 16 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·6, being 0°·6 above that for the previous week, but 0°·2 below that for the corresponding week of last year. The mean rainfall was 1·50 inch.

IN THE PRINCIPAL TOWNS OF  
**SCOTLAND.**

By Authority of the Registrar-General.

---

**No. 14.      Week ending SATURDAY, APRIL 11, 1925.      Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 11th April 1925 the births of 974 living children, the deaths of 783 persons, and 349 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 752. The equivalent annual birth-rate is 21·0 per thousand, the marriage-rate 7·5, and the death-rate corrected 16·2.

The birth-rate for the week is 2·1 below that for the previous week, 1·9 below the mean of the rates for the three preceding weeks, and 4·7 below that for the corresponding week of last year. The marriage-rate for the week is 0·9 above that for the previous week, 1·8 above the mean of the rates for the three preceding weeks, and 1·1 above that for the corresponding week of last year. The death-rate for the week is 1·6 above that for the previous week, and 1·3 above the mean of the rates for the three preceding weeks, but is 2·8 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·3 in Dundee, and 19·6 in Greenock and in Motherwell and Wishaw, to 8·7 in Dunfermline, 12·5 in Paisley, and 14·2 in Hamilton and in Kilmarnock. In Kirkcaldy it was 19·4, in Clydebank 18·4, in Perth 17·2, in Aberdeen 16·7, in Coatbridge 16·1, in Glasgow 15·9, in Ayr 15·5, in Edinburgh 15·4, and in Falkirk 15·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 68. They are 1 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include none from enteric fever, 7 from measles, 6 from scarlet fever, 44 from whooping-cough, 4 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 8 more, but those from scarlet fever and from the diarrhoeas of childhood each number the same, while those from enteric fever are 1 fewer, from measles 2 fewer, and from diphtheria 4 fewer.

Deaths from influenza numbered 5. They are 1 fewer than in the previous week, and 4 fewer than the mean of the numbers for the three preceding weeks.

Deaths from respiratory diseases numbered 124. They are 19 more than in the previous week, and 6 more than the mean of the numbers for the three preceding weeks.

Deaths of children of less than one year old numbered 138, and those of persons of sixty-five and upwards 224. The former are 37 more than in the previous week, and the latter are 16 more than in that week.

Deaths attributed to violent causes numbered 30. They are 15 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·7, being 4°·1 above that for the previous week, and 3°·8 above that for the corresponding week of last year. The mean rainfall was 0·55 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 15. Week ending SATURDAY, APRIL 18, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 18th April 1925 the births of 1192 living children, the deaths of 676 persons, and 515 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 671. The equivalent annual birth-rate is 25·7 per thousand, the marriage-rate 11·1, and the death-rate corrected 14·5.

The birth-rate for the week is 4·7 above that for the previous week, 3·4 above the mean of the rates for the three preceding weeks, and 4·9 above that for the corresponding week of last year. The marriage-rate for the week is 3·6 above that for the previous week, 4·2 above the mean of the rates for the three preceding weeks, and 4·7 above that for the corresponding week of last year. The death-rate for the week is 1·7 below that for the previous week, 0·5 below the mean of the rates for the three preceding weeks, and 2·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·1 in Dundee, 17·4 in Dunfermline, and 17·1 in Kilmarnock, to 8·0 in Motherwell and Wishaw, 10·6 in Falkirk, and 11·3 in Ayr. In Aberdeen it was 16·1, in Coatbridge 16·1, in Hamilton 15·5, in Edinburgh 14·9, in Greenock 14·5, in Paisley 14·3, in Perth 14·1, in Glasgow 13·9, in Kirkcaldy 12·9, and in Clydebank 11·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 52. They are 16 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include none from enteric fever, 2 from measles, 3 from scarlet fever, 37 from whooping-cough, 2 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 1 more, but those from diphtheria are 2 fewer, from scarlet fever 3 fewer, from measles 5 fewer, and from whooping-cough 7 fewer.

Deaths from influenza numbered 15. They are 10 more than in the previous week, and 8 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 103. They are 21 fewer than in the previous week, and 16 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 106, and those of persons of sixty-five and upwards 219. The former are 32 fewer than in the previous week, and the latter are 5 fewer than in that week.

Deaths attributed to violent causes numbered 34. They are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·6, being 0°·1 below that for the previous week, but 1°·6 above that for the corresponding week of last year. The mean rainfall was 1·96 inch.

WEEKLY RETURN  
OF  
BIRTHS, DEATHS, & MARRIAGES  
IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 16. Week ending SATURDAY, APRIL 25, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 25th April 1925 the births of 1153 living children, the deaths of 712 persons, and 376 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 688. The equivalent annual birth-rate is 24·9 per thousand, the marriage-rate 8·1, and the death-rate corrected 14·9.

The birth-rate for the week is 0·8 below that for the previous week, and 0·7 below that for the corresponding week of last year, but is 1·6 above the mean of the rates for the three preceding weeks. The marriage-rate for the week is 3·0 below that for the previous week, 0·3 below the mean of the rates for the three preceding weeks, and 4·1 below that for the corresponding week of last year. The death-rate for the week is 0·4 above that for the previous week, but is 0·2 below the mean of the rates for the three preceding weeks and 1·9 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·4 in Kirkcaldy, 18·4 in Clydebank, and 18·3 in Ayr, to 9·0 in Hamilton, 10·6 in Falkirk, and 11·0 in Perth. In Kilmarnock it was 17·1, in Glasgow 15·5, in Dundee 15·2, in Coatbridge 15·0, in Greenock 14·5, in Motherwell and Wishaw 14·5, in Edinburgh 14·4, in Dunfermline 13·7, in Paisley 13·1, and in Aberdeen 12·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 54. They are 2 more than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 1 from enteric fever, 7 from measles, 3 from scarlet fever, 30 from whooping-cough, 8 from diphtheria, and 5 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 6 more, from measles 5 more, and from enteric fever 1 more, but those from scarlet fever number the same, while those from the diarrhoeas of childhood are 3 fewer, and from whooping-cough 7 fewer.

Deaths from influenza numbered 5. They are 10 fewer than in the previous week, and 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 104. They are 1 more than in the previous week, but 7 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 109, and those of persons of sixty-five and upwards 199. The former are 3 more than in the previous week, and the latter are 20 fewer than in that week.

Deaths attributed to violent causes numbered 36. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·5, being 0°·1 below that for the previous week, and 3°·5 below that for the corresponding week of last year. The mean rainfall was 0·74 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

---

No. 17.      Week ending SATURDAY, MAY 2, 1925.      Price 2d. net.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 2nd May 1925 the births of 1191 living children, the deaths of 680 persons, and 632 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 630. The equivalent annual birth-rate is 25·7 per thousand, the marriage-rate 13·6, and the death-rate corrected 13·6.

The birth-rate for the week is 0·8 above that for the previous week, 1·8 above the mean of the rates for the three preceding weeks, and 0·1 above that for the corresponding week of last year. The marriage-rate for the week is 5·5 above that for the previous week, 4·7 above the mean of the rates for the three preceding weeks, and 0·7 above that for the corresponding week of last year. The death-rate for the week is 1·3 below that for the previous week, 1·6 below the mean of the rates for the three preceding weeks, and 2·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·9 in Perth, 20·8 in Coatbridge, and 18·9 in Greenock, to 7·6 in Clydebank, 10·0 in Dunfermline, and 10·6 in Falkirk. In Kilmarnock it was 15·6, in Edinburgh 14·6, in Kirkcaldy 14·2, in Aberdeen 13·8, in Paisley 13·7, in Motherwell and Wishaw 13·1, in Glasgow 13·0, in Hamilton 12·9, in Ayr 12·7 and in Dundee 11·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 63. They are 9 more than in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include none from enteric fever, 11 from measles, 5 from scarlet fever, 37 from whooping-cough, 1 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 7 more, from measles 4 more, from the diarrhoeas of childhood 4 more, and from scarlet fever 2 more, but those from diphtheria are 7 fewer.

Deaths from influenza numbered 4. They are 1 fewer than in the previous week, and 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 91. They are 13 fewer than in the previous week, and 19 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 106, and those of persons of sixty-five and upwards 194. The former are 3 fewer than in the previous week, and the latter are 5 fewer than in that week.

Deaths attributed to violent causes numbered 26. They are 10 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·5, being 1°·0 below that for the previous week, and 1°·2 below that for the corresponding week of last year. The mean rainfall was 0·39 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No 18.

Week ending SATURDAY, MAY 9, 1925.

Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 9th May 1925 the births of 1095 living children, the deaths of 664 persons, and 169 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 630. The equivalent annual birth-rate is 23·6 per thousand, the marriage-rate 3·6, and the death-rate corrected 13·6.

The birth-rate for the week is 2·1 below that for the previous week, 1·8 below the mean of the rates for the three preceding weeks, and 2·0 below that for the corresponding week of last year. The marriage-rate for the week is 10·0 below that for the previous week, 7·3 below the mean of the rates for the three preceding weeks, but 0·9 above that for the corresponding week of last year. The death-rate for the week is the same as that for the previous week, 0·7 below the mean of the rates for the three preceding weeks, and 1·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·4 in Kirkcaldy, 18·4 in Clydebank, and 16·7 in Falkirk, to 7·8 in Paisley, 9·5 in Greenock, and 10·3 in Hamilton. In Dunfermline it was 16·2, in Glasgow 14·3, in Edinburgh 13·8, in Dundee 13·1, in Aberdeen 13·1, in Motherwell and Wishaw 13·1, in Ayr 12·7, in Perth 12·5, in Coatbridge, 11·5, and in Kilmarnock 11·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 55. They are 8 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include none from enteric fever, 4 from measles, 3 from scarlet fever, 35 from whooping-cough, 5 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 4 more, but those from the diarrhoeas of childhood are 1 fewer, from scarlet fever 2 fewer, from whooping-cough 2 fewer, and from measles 7 fewer.

Deaths from influenza numbered 4. They are the same as in the previous week, but 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 100. They are 9 more than in the previous week, and 1 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 102, and those of persons of sixty-five and upwards 207. The former are 4 fewer than in the previous week, and the latter are 13 more than in that week.

Deaths attributed to violent causes numbered 28. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 47°·9, being 4°·4 above that for the previous week, and 5°·0 above that for the corresponding week of last year. The mean rainfall was 1·20 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 19. Week ending SATURDAY, MAY 16, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 16th May 1925 the births of 1205 living children, the deaths of 672 persons, and 118 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 639. The equivalent annual birth-rate is 26·0 per thousand, the marriage-rate 2·5, and the death-rate corrected 13·8.

The birth-rate for the week is 2·4 above that for the previous week, 1·3 above the mean of the rates for the three preceding weeks, and 2·1 above that for the corresponding week of last year. The marriage-rate for the week is 1·1 below that for the previous week, 5·9 below the mean of the rates for the three preceding weeks, and 0·1 below that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, but is 0·2 below the mean of the rates for the three preceding weeks, and 1·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·3 in Ayr, 17·6 in Dundee, and 17·4 in Motherwell and Wishaw, to 6·5 in Kirkcaldy, 7·6 in Clydebank, and 8·7 in Dunfermline. In Kilmarnock it was 17·1, in Greenock 15·1, in Coatbridge 15·0, in Perth 14·1, in Glasgow 13·9, in Edinburgh 13·2, in Aberdeen 13·1, in Paisley 12·5, in Falkirk 12·1, and in Hamilton 10·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 71. They are 16 more than in the previous week, and are equal to an annual death-rate from these causes of 1·5 per thousand. These deaths include 1 from enteric fever, 8 from measles, 2 from scarlet fever, 48 from whooping-cough, 5 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 13 more, from measles 4 more, and from enteric fever 1 more, but those from diphtheria number the same, and those from scarlet fever and from the diarrhoeas of childhood each number 1 fewer.

Deaths from influenza numbered 3. They are 1 fewer than in the previous week, and 1 fewer than the mean of the numbers for the three preceding weeks.

Deaths from respiratory diseases numbered 111. They are 11 more than in the previous week, and 13 more than the mean of the numbers for the three preceding weeks.

Deaths of children of less than one year old numbered 108, and those of persons of sixty-five and upwards 203. The former are 6 more than in the previous week, and the latter are 4 fewer than in that week.

Deaths attributed to violent causes numbered 19. They are 9 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 51°·1, being 3°·2 above that for the previous week, and 0°·4 above that for the corresponding week of last year. The mean rainfall was 0·67 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

---

No. 20.      Week ending SATURDAY. MAY 23, 1925.      Price 2d. net

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 23rd May 1925 the births of 1041 living children, the deaths of 647 persons, and 117 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 615. The equivalent annual birth-rate is 22·5 per thousand, the marriage-rate 2·5, and the death-rate corrected 13·3.

The birth-rate for the week is 3·5 below that for the previous week, 2·6 below the mean of the rates for the three preceding weeks, and 0·7 below that for the corresponding week of last year. The marriage-rate for the week is the same as that for the previous week, 4·1 below the mean of the rates for the three preceding weeks, and 0·3 below that for the corresponding week of last year. The death-rate for the week is 0·5 below that for the previous week, and 0·4 below the mean of the rates for the three preceding weeks, but 0·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·8 in Perth, 17·3 in Dundee, and 17·0 in Greenock, to 4·6 in Falkirk, 8·5 in Kilmarnock, and 9·0 in Paisley. In Clydebank it was 15·1, in Coatbridge 15·0, in Kirkcaldy 14·2, in Ayr 14·1, in Glasgow 13·2, in Edinburgh 12·9, in Hamilton 12·9, in Aberdeen 12·5, in Motherwell and Wishaw 12·3, and in Dunfermline 10·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 57. They are 14 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include none from enteric fever, 6 from measles, 4 from scarlet fever, 33 from whooping-cough, 7 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 2 more, and from diphtheria 2 more, while those from the diarrhoeas of childhood number the same, and those from measles are 2 fewer, and from whooping-cough 15 fewer.

Deaths from influenza numbered 6. They are 3 more than in the previous week, and 2 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 97. They are 14 fewer than in the previous week, and 4 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 99, and those of persons of sixty-five and upwards 200. The former are 9 fewer than in the previous week, and the latter are 3 fewer than in that week.

Deaths attributed to violent causes numbered 38. They are 19 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 52°·8, being 1°·7 above that for the previous week, and 1°·8 above that for the corresponding week of last year. The mean rainfall was 0·69 inch.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 30th May 1925 the births of 1180 living children, the deaths of 574 persons, and 124 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 560. The equivalent annual birth-rate is 25·5 per thousand, the marriage-rate 2·7, and the death-rate corrected 12·1.

The birth-rate for the week is 3·0 above that for the previous week, 1·5 above the mean of the rates for the three preceding weeks, and 2·3 above that for the corresponding week of last year. The marriage-rate for the week is 0·2 above that for the previous week, and 0·2 above that for the corresponding week of last year, but 0·2 below the mean of the rates for the three preceding weeks. The death-rate for the week is 1·2 below that for the previous week, 1·5 below the mean of the rates for the three preceding weeks, and 0·9 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·6 in Hamilton, 15·2 in Falkirk, and 14·1 in Ayr, to 8·7 in Motherwell and Wishaw, 9·0 in Kirkcaldy, and 9·4 in Perth. In Greenock it was 13·9, in Dundee 13·7, in Clydebank 13·0, in Glasgow 12·2, in Edinburgh 11·8, in Coatbridge 11·5, in Kilmarnock, 11·4, in Aberdeen 10·5, in Paisley 10·2, and in Dunfermline 10·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 48. They are 9 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include none from enteric fever, 9 from measles, 1 from scarlet fever, 29 from whooping-cough, 6 from diphtheria, and 3 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 3 more, but those from diphtheria are 1 fewer, from scarlet fever 3 fewer, from whooping-cough 4 fewer, and from the diarrhoeas of childhood 4 fewer.

Deaths from influenza numbered 5. They are 1 fewer than in the previous week, but 1 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 78. They are 19 fewer than in the previous week, and 25 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 79, and those of persons of sixty-five and upwards 163. The former are 20 fewer than in the previous week, and the latter are 37 fewer than in that week.

Deaths attributed to violent causes numbered 29. They are 9 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 51°·1, being 1°·7 below that for the previous week, but 0°·1 above that for the corresponding week of last year. The mean rainfall was 2·55 inches

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 22.

Week ending SATURDAY, JUNE 6, 1925.

Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 6th June 1925 the births of 1158 living children, the deaths of 576 persons, and 464 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 556. The equivalent annual birth-rate is 25·0 per thousand, the marriage-rate 10·0, and the death-rate corrected 12·0.

The birth-rate for the week is 0·5 below that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, and 0·9 above that for the corresponding week of last year. The marriage-rate for the week is 7·3 above that for the previous week, 7·4 above the mean of the rates for the three preceding weeks, and 0·1 above that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, 1·1 below the mean of the rates for the three preceding weeks, and 1·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·0 in Kirkcaldy, 14·2 in Hamilton, and 13·8 in Motherwell and Wishaw, to 2·3 in Coatbridge, 5·7 in Kilmarnock, and 6·1 in Falkirk. In Dundee it was 13·4, in Edinburgh 13·3, in Aberdeen 12·5, in Glasgow 12·3, in Perth 11·0, in Dunfermline 10·0, in Paisley 9·6, in Greenock 8·8, in Clydebank 8·6, and in Ayr 7·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 52. They are 4 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include none from enteric fever, 3 from measles, 9 from scarlet fever, 27 from whooping-cough, 5 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 8 more, and from the diarrhoeas of childhood 5 more, but those from diphtheria are 1 fewer, from whooping-cough 2 fewer, and from measles 6 fewer.

Deaths from influenza numbered 1. They are 4 fewer than in the previous week, and 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 70. They are 8 fewer than in the previous week, and 25 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 78, and those of persons of sixty-five and upwards 162. The former are 1 fewer than in the previous week, and the latter are 1 fewer than in that week.

Deaths attributed to violent causes numbered 24. They are 5 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·6, being 3°·5 above that for the previous week, and 4°·9 above that for the corresponding week of last year. The mean rainfall was 0·57 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

---

No 23.      Week ending SATURDAY, JUNE 13, 1925.      Price 2d. net

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 13th June 1925 the births of 1177 living children, the deaths of 624 persons, and 606 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 597. The equivalent annual birth-rate is 25·4 per thousand, the marriage-rate 13·1, and the death-rate corrected 12·9.

The birth-rate for the week is 0·4 above that for the previous week, 1·1 above the mean of the rates for the three preceding weeks, and 0·5 above that for the corresponding week of last year. The marriage-rate for the week is 3·1 above that for the previous week, 8·0 above the mean of the rates for the three preceding weeks, but 1·2 below that for the corresponding week of last year. The death-rate for the week is 0·9 above that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, but 0·4 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·6 in Motherwell and Wishaw, 14·3 in Paisley, and 13·7 in Dunfermline, to 6·3 in Perth, 7·1 in Kilmarnock, and 7·6 in Falkirk. In Glasgow it was 13·6, in Aberdeen 13·4, in Edinburgh and in Dundee 13·1, in Hamilton 11·6, in Coatbridge 11·5, in Kirkcaldy 10·3, in Greenock 8·8, in Clydebank 8·6, and in Ayr 8·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 49. They are 3 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include none from enteric fever, 1 from measles, 7 from scarlet fever, 29 from whooping-cough, 3 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 2 more, and from the diarrhoeas of childhood 1 more, but those from measles, from scarlet fever, and from diphtheria are each 2 fewer.

Deaths from influenza numbered 6. They are 5 more than in the previous week, and 2 more than the mean of the numbers for the three preceding weeks.

Deaths from respiratory diseases numbered 63. They are 7 fewer than in the previous week, and 19 fewer than the mean of the numbers for the three preceding weeks.

Deaths of children of less than one year old numbered 90, and those of persons of sixty-five and upwards 179. The former are 12 more than in the previous week, and the latter are 17 more than in that week.

Deaths attributed to violent causes numbered 32. They are 8 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 59°·3, being 4°·7 above that for the previous week, and 5°·3 above that for the corresponding week of last year. The mean rainfall was 0·02 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No 24.

Week ending SATURDAY, JUNE 20, 1925.

Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 20th June 1925 the births of 1143 living children, the deaths of 598 persons, and 378 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 563. The equivalent annual birth-rate is 24·7 per thousand, the marriage-rate 8·2, and the death-rate corrected 12·2.

The birth-rate for the week is 0·7 below that for the previous week, 0·6 below the mean of the rates for the three preceding weeks, but 1·2 above that for the corresponding week of last year. The marriage-rate for the week is 4·9 below that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, and 1·0 below that for the corresponding week of last year. The death-rate for the week is 0·7 below that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, and 0·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·4 in Dundee, 14·1 in Perth, and 13·9 in Greenock, to 7·5 in Dunfermline, 9·0 in Hamilton, and 9·1 in Falkirk. In Coatbridge it was 13·8, in Edinburgh 13·5, in Kirkcaldy 12·9, in Kilmarnock 12·8, in Glasgow 11·7, in Motherwell and Wishaw 10·9, in Aberdeen 10·5, in Ayr 9·9, in Clydebank 9·7, and in Paisley 9·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 54. They are 5 more than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include none from enteric fever, 3 from measles, 5 from scarlet fever, 26 from whooping-cough, 10 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 7 more, from measles 2 more, and from the diarrhoeas of childhood 1 more, but deaths from scarlet fever are 2 fewer, and from whooping-cough 3 fewer.

Deaths from influenza numbered 1. They are 5 fewer than in the previous week, and 3 fewer than the mean of the numbers for the three preceding weeks.

Deaths from respiratory diseases numbered 66. They are 3 more than in the previous week, but 4 fewer than the mean of the numbers for the three preceding weeks.

Deaths of children of less than one year old numbered 81, and those of persons of sixty-five and upwards 173. The former are 9 fewer than in the previous week, and the latter are 6 fewer than in that week.

Deaths attributed to violent causes numbered 29. They are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 57°·7, being 1°·6 below that for the previous week, but 1°·1 above that for the corresponding week of last year. The mean rainfall was 0·06 inch.

# WEEKLY RETURN

OF

## BIRTHS, DEATHS, & MARRIAGES

### IN THE PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

---

No 25.      Week ending SATURDAY. JUNE 27, 1925.      Price 2d. net.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 27th June 1925 the births of 1138 living children, the deaths of 573 persons, and 453 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 532. The equivalent annual birth-rate is 24·6 per thousand, the marriage-rate 9·8, and the death-rate corrected 11·5.

The birth-rate for the week is 0·1 below that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, and 0·1 below that for the corresponding week of last year. The marriage-rate for the week is 1·6 above that for the previous week, 0·6 below the mean of the rates for the three preceding weeks, and 0·7 below that for the corresponding week of last year. The death-rate for the week is 0·7 below that for the previous week, 0·9 below the mean of the rates for the three preceding weeks, and 0·4 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·3 in Coatbridge, 16·7 in Falkirk, and 14·5 in Greenock, to 5·2 in Kirkcaldy, 6·3 in Perth, and 8·7 in Motherwell and Wishaw. In Glasgow it was 12·7, in Paisley 12·5, in Hamilton 11·6, in Kilmarnock 11·4, in Ayr 11·3, in Edinburgh 10·3, in Dunfermline 10·0, in Dundee 9·7, in Clydebank 9·7, and in Aberdeen 8·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 45. They are 9 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include none from enteric fever, 1 from measles, 5 from scarlet fever, 24 from whooping-cough, 5 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever and the diarrhoeas of childhood number the same, while those from measles and whooping-cough are each 2 fewer, and from diphtheria 5 fewer.

Deaths from influenza numbered 5. They are 4 more than in the previous week, and 2 more than the mean of the numbers for the three preceding weeks.

Deaths from respiratory diseases numbered 54. They are 12 fewer than in the previous week, and 12 fewer than the mean of the numbers for the three preceding weeks.

Deaths of children of less than one year old numbered 69, and those of persons of sixty-five and upwards 153. The former are 12 fewer than in the previous week, and the latter are 20 fewer than in that week.

Deaths attributed to violent causes numbered 29. They are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 57°·5, being 0°·2 below that for the previous week, but 0°·8 above that for the corresponding week of last year. The mean rainfall was 0·00 inch.

Note :—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.  
\* Cerebro-spinal meningitis.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 26.

Week ending SATURDAY, JULY 4, 1925.

Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 4th July 1925 the births of 1080 living children, the deaths of 580 persons, and 606 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 554. The equivalent annual birth-rate is 23·3 per thousand, the marriage-rate 13·1, and the death-rate corrected 12·0.

The birth-rate for the week is 1·3 below that for the previous week, and 1·6 below the mean of the rates for the three preceding weeks, but 0·1 above that for the corresponding week of last year. The marriage-rate for the week is 3·3 above that for the previous week, 2·7 above the mean of the rates for the three preceding weeks, and 0·6 above that for the corresponding week of last year. The death-rate for the week is 0·5 above that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, and 0·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 15·6 in Kilmarnock, 14·5 in Motherwell and Wishaw, and 14·2 in Edinburgh, to 6·2 in Dunfermline, 6·3 in Perth, and 7·2 in Paisley. In Dundee it was 12·8, in Glasgow 12·3, in Hamilton 11·6, in Ayr 11·3, in Coatbridge 10·4, in Kirkcaldy 10·3, in Greenock 10·1, in Aberdeen 9·8, in Clydebank 9·7, and in Falkirk 9·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 38. They are 7 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include none from enteric fever, 4 from measles, 5 from scarlet fever, 16 from whooping-cough, 2 from diphtheria, and 11 from the diarrhœas of childhood. Compared with the returns for the previous week, deaths from measles are 3 more, and from the diarrhœas of childhood 1 more, but those from scarlet fever number the same, while from diphtheria they are 3 fewer, and from whooping-cough 8 fewer.

Deaths from influenza numbered 5. They are the same as in the previous week, but 1 more than the mean of the numbers of the three preceding weeks.

Deaths from respiratory diseases numbered 73. They are 19 more than in the previous week, and 12 more than the mean of the numbers of the three preceding weeks.

Deaths of children of less than one year old numbered 82, and those of persons of sixty-five and upwards 168. The former are 13 more than in the previous week, and the latter are 15 more than in that week.

Deaths attributed to violent causes numbered 32. They are 3 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 59°·2, being 1°·7 above that for the previous week, and 3°·4 above that for the corresponding week of last year. The mean rainfall was 0·25 inch.

**Note :—**Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.

\* Cerebro-spinal meningitis.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No 27. Week ending SATURDAY, JULY 11, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 11th July 1925 the births of 1108 living children, the deaths of 537 persons, and 376 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 516. The equivalent annual birth-rate is 23·9 per thousand, the marriage-rate 8·1, and the death-rate corrected 11·1.

The birth-rate for the week is 0·6 above that for the previous week, and 0·8 above that for the corresponding week of last year, but 0·3 below the mean of the rates for the three preceding weeks. The marriage-rate for the week is 5·0 below that for the previous week, 2·3 below the mean of the rates for the three preceding weeks, but 0·2 above that for the corresponding week of last year. The death-rate for the week is 0·9 below that for the previous week, 0·8 below the mean of the rates for the three preceding weeks, and 0·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 14·1 in Clydebank, 13·7 in Paisley, and 12·9 in Hamilton, to 2·5 in Dunfermline, 8·1 in Coatbridge, 9·4 in Motherwell and Wishaw, and 9·4 in Perth. In Falkirk it was 12·1, in Glasgow 11·6, in Aberdeen 11·5, in Edinburgh 10·9, in Dundee 10·9, in Kirkcaldy 10·3, in Greenock 10·1, in Kilmarnock 10·0, and in Ayr 9·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 41. They are 3 more than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include none from enteric fever, 5 from measles, 4 from scarlet fever, 16 from whooping-cough, 3 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 2 more, from measles 1 more, and from diphtheria 1 more, but those from whooping-cough number the same, while those from scarlet fever are 1 fewer.

Deaths from influenza numbered 5. They are the same as in the previous week, but 1 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 65. They are 8 fewer than in the previous week, but 1 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 73, and those of persons of sixty-five and upwards 151. The former are 9 fewer than in the previous week, and the latter are 17 fewer than in that week.

Deaths attributed to violent causes numbered 33. They are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 59°·5, being 0°·3 above that for the previous week, but the same as that for the corresponding week of last year. The mean rainfall was 0·22 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

---

---

No 28.      Week ending SATURDAY, JULY 18, 1925.      Price 2d. net

---

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 18th July 1925 the births of 1039 living children, the deaths of 517 persons, and 562 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 511. The equivalent annual birth-rate is 22·4 per thousand, the marriage-rate 12·1, and the death-rate corrected 11·0.

The birth-rate for the week is 1·5 below that for the previous week, 1·5 below the mean of the rates for the three preceding weeks, and 0·3 below that for the corresponding week of last year. The marriage-rate for the week is 4·0 above that for the previous week, 1·8 above the mean of the rates for the three preceding weeks, but 0·3 below that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, 0·5 below the mean of the rates for the three preceding weeks, and 0·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·4 in Aberdeen, 15·6 in Perth, and 14·2 in Kirkealdy, to 6·5 in Hamilton, 7·3 in Motherwell and Wishaw, and 8·1 in Coatbridge. In Edinburgh it was 12·8, in Kilmarnock 12·8, in Ayr 12·7, in Greenock 12·6, in Paisley 11·9, in Dunfermline 11·2, in Glasgow 10·0, in Dundee 9·1, in Falkirk 9·1, and in Clydebank 8·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 31. They are 10 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include 2 from enteric fever, 2 from measles, 2 from scarlet fever, 14 from whooping-cough, 2 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from enteric fever are 2 more, but those from diphtheria are 1 fewer, from scarlet fever 2 fewer, from whooping-cough 2 fewer, from measles 3 fewer, and from the diarrhoeas of childhood 4 fewer.

Deaths from influenza numbered 1. They are 4 fewer than in the previous week, and 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 51. They are 14 fewer than in the previous week, and 13 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 75, and those of persons of sixty-five and upwards 161. The former are 2 more than in the previous week, and the latter are 10 more than in that week.

Deaths attributed to violent causes numbered 25. They are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 60°·9, being 1°·4 above that for the previous week, and 2°·0 above that for the corresponding week of last year. The mean rainfall was 0·57 inch.

WEEKLY RETURN  
OF  
BIRTHS, DEATHS, & MARRIAGES  
IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

---

No 29	Week ending SATURDAY, JULY 25, 1925.	Price 2d. net
-------	--------------------------------------	---------------

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 25th July 1925 the births of 1028 living children, the deaths of 579 persons, and 833 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 558. The equivalent annual birth-rate is 22·2 per thousand, the marriage-rate 18·0, and the death-rate corrected 12·1.

The birth-rate for the week is 0·2 below that for the previous week, 1·0 below the mean of the rates for the three preceding weeks, and 0·5 below that for the corresponding week of last year. The marriage-rate for the week is 5·9 above that for the previous week, 6·9 above the mean of the rates for the three preceding weeks, but 2·5 below that for the corresponding week of last year. The death-rate for the week is 1·1 above that for the previous week, 0·7 above the mean of the rates for the three preceding weeks, but 0·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·2 in Clydebank, 14·2 in Kirkcaldy, and 14·1 in Perth, to 6·3 in Greenock, 7·6 in Falkirk, 8·5 in Kilmarnock, and 8·5 in Ayr. In Aberdeen it was 13·4, in Glasgow 13·0, in Hamilton 12·9, in Paisley 11·9, in Motherwell and Wishaw 11·6, in Coatbridge 11·5, in Dundee 11·2, in Dunfermline 11·2, and in Edinburgh 10·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 42. They are 11 more than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include none from enteric fever, 1 from measles, 7 from scarlet fever, 21 from whooping-cough, 3 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 7 more, from scarlet fever 5 more, from diphtheria 1 more, and from the diarrhoeas of childhood 1 more, but those from measles are 1 fewer.

Deaths from influenza numbered 2. They are 1 more than in the previous week, but 2 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 62. They are 11 more than in the previous week, but 1 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 99, and those of persons of sixty-five and upwards 180. The former are 24 more than in the previous week, and the latter are 19 more than in that week.

Deaths attributed to violent causes numbered 25. They are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 62°·3, being 1°·4 above that for the previous week, and 6°·2 above that for the corresponding week of last year. The mean rainfall was 0·63 inch.

## WEEKLY RETURN

OF

## BIRTHS, DEATHS, &amp; MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 30. Week ending SATURDAY, AUGUST 1, 1925. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 1st August 1925 the births of 1073 living children, the deaths of 530 persons, and 534 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 510. The equivalent annual birth-rate is 23·2 per thousand, the marriage-rate 11·5, and the death-rate corrected 11·0.

The birth-rate for the week is 1·0 above that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, but is the same as that for the corresponding week of last year. The marriage-rate for the week is 6·5 below that for the previous week, 1·2 below the mean of the rates for the three preceding weeks, but 1·7 above that for the corresponding week of last year. The death rate for the week is 1·1 below that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, and 0·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·4 in Dundee, 14·5 in Motherwell and Wishaw, and 12·5 in Dunfermline, to 6·5 in Hamilton, 7·0 in Ayr, and 7·6 in Clydebank. In Glasgow it was 11·8, in Coatbridge 11·5, in Paisley 10·8, in Aberdeen 9·5, in Edinburgh 9·3, in Falkirk 9·1, in Kilmarnock 8·5, in Greenock 8·2, in Kirkcaldy 7·8, and in Perth 7·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 34. They are 8 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include 1 from enteric fever, 1 from measles, 2 from scarlet fever, 13 from whooping-cough, 1 from diphtheria, and 16 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 6 more, and from enteric fever 1 more, but those from measles number the same, while those from diphtheria are 2 fewer, from scarlet fever 5 fewer, and from whooping-cough 8 fewer.

Deaths from influenza numbered 5. They are 3 more than in the previous week, and 2 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 69. They are 7 more than in the previous week, and 10 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 82, and those of persons of sixty-five and upwards 155. The former are 17 fewer than in the previous week, and the latter are 25 fewer than in that week.

Deaths attributed to violent causes numbered 25. They are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 57°·8, being 4°·5 below that for the previous week, but 0°·7 above that for the corresponding week of last year. The mean rainfall was 0·62 inch.

# WEEKLY RETURN

OF

## BIRTHS, DEATHS, AND MARRIAGES

IN THE PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

---

**No. 31.      Week ending SATURDAY, AUGUST 8, 1925.      Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 8th August 1925 the births of 966 living children, the deaths of 552 persons, and 384 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 530. The equivalent annual birth-rate is 20·9 per thousand, the marriage-rate 8·3, and the death-rate corrected 11·4.

The birth-rate for the week is 2·3 below that for the previous week, 1·7 below the mean of the rates for the three preceding weeks, and 1·7 below that for the corresponding week of last year. The marriage-rate for the week is 3·2 below that for the previous week, 5·6 below the mean of the rates for the three preceding weeks, but 0·9 above that for the corresponding week of last year. The death-rate for the week is 0·4 above that for the previous week, the same as the mean of the rates for the three preceding weeks, and 0·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·4 in Dunfermline, 17·2 in Perth, and 15·1 in Greenock, to 4·6 in Falkirk, 6·5 in Hamilton, and 9·0 in Kirkcaldy. In Coatbridge it was 13·8, in Motherwell and Wishaw 13·1, in Clydebank 13·0, in Paisley 12·5, in Edinburgh 11·5, in Aberdeen 11·5, in Glasgow 11·2, in Dundee 10·0, in Kilmarnock 10·0, and in Ayr 9·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 43. They are 9 more than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 1 from enteric fever, none from measles, 2 from scarlet fever, 16 from whooping-cough, 2 from diphtheria, and 22 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 6 more, from whooping-cough 3 more, and from diphtheria 1 more, while those from enteric fever and scarlet fever each number the same, and those from measles are 1 fewer.

No deaths from influenza were registered during the week. In the previous week there were 5 such deaths.

Deaths from respiratory diseases numbered 61. They are 8 fewer than in the previous week, but are the same as the mean of the three preceding weeks.

Deaths of children of less than one year old numbered 77, and those of persons of sixty-five and upwards 169. The former are 5 fewer than in the previous week, and the latter are 14 more than in that week.

Deaths attributed to violent causes numbered 33. They are 8 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 58°·5, being 0°·7 above that for the previous week, and 1°·5 above that for the corresponding week of last year. The mean rainfall was 0·78 inch.

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 32.      Week ending SATURDAY, AUGUST 15, 1925.      Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 15th August 1925 the births of 982 living children, the deaths of 564 persons, and 270 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 538. The equivalent annual birth-rate is 21·2 per thousand, the marriage-rate 5·8, and the death-rate corrected 11·6.

The birth-rate for the week is 0·3 above that for the previous week, but 0·9 below the mean of the rates for the three preceding weeks, and 0·3 below that for the corresponding week of last year. The marriage-rate for the week is 2·5 below that for the previous week, 6·8 below the mean of the rates for the three preceding weeks, and 0·3 below that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, 0·1 above the mean of the rates for the three preceding weeks, and 0·6 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·2 in Clydebank, 16·1 in Coatbridge, and 14·2 in Kilmarnock, to 4·6 in Falkirk, 5·2 in Kirkcaldy, and 7·8 in Perth. In Greenock it was 13·2, in Dundee 13·1, in Glasgow 11·9, in Edinburgh 11·7, in Dunfermline 11·2, in Motherwell and Wishaw 10·9, in Aberdeen 10·5, in Ayr 9·9, in Paisley 9·6, and in Hamilton 9·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 49. They are 6 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 1 from enteric fever, 1 from measles, 6 from scarlet fever, 14 from whooping-cough, 2 from diphtheria, and 25 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 4 more, from the diarrhoeas of childhood 3 more, and from measles 1 more, while those from enteric fever and diphtheria number the same, and those from whooping-cough are 2 fewer.

Deaths from influenza numbered 4. They are 4 more than in the previous week, and 2 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 56. They are 5 fewer than in the previous week, and 8 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 93, and those of persons of sixty-five and upwards 145. The former are 16 more than in the previous week, and the latter are 24 fewer than in that week.

Deaths attributed to violent causes numbered 26. They are 7 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 60°·1, being 1°·6 above that for the previous week, and 2°·6 above that for the corresponding week of last year. The mean rainfall was 0·67 inch.

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 33.      Week ending SATURDAY, AUGUST 22, 1925.      Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 22nd August 1925 the births of 932 living children, the deaths of 548 persons, and 311 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 520. The equivalent annual birth-rate is 20·1 per thousand, the marriage-rate 6·7, and the death-rate corrected 11·2.

The birth-rate for the week is 1·1 below that for the previous week, 1·7 below the mean of the rates for the three preceding weeks, and 1·8 below that for the corresponding week of last year. The marriage-rate for the week is 0·9 above that for the previous week, but 1·8 below the mean of the rates for the three preceding weeks, and 0·8 below that for the corresponding week of last year. The death-rate for the week is 0·4 below that for the previous week, and 0·1 below the mean of the rates for the three preceding weeks, but 0·1 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·5 in Coatbridge, 14·2 in Kirkcaldy, and 13·7 in Falkirk, to 6·5 in Motherwell and Wishaw, 6·9 in Aberdeen, and 7·6 in Clydebank. In Edinburgh it was 12·6, in Dundee 11·8, in Glasgow 11·4, in Greenock 11·4, in Kilmarnock 11·4, in Ayr 11·3, in Dunfermline 11·2, in Hamilton 10·3, in Paisley 10·2, and in Perth 7·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 40. They are 9 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include none from enteric fever, 1 from measles, 3 from scarlet fever, 9 from whooping-cough, 3 from diphtheria, and 24 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 1 more, those from measles number the same, while those from the diarrhoeas of childhood are 1 fewer, from scarlet fever 3 fewer, and from whooping-cough 5 fewer.

Deaths from influenza numbered 3. They are 1 fewer than in the previous week, but are the same as the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 40. They are 16 fewer than in the previous week, and 22 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 74, and those of persons of sixty-five and upwards 145. The former are 19 fewer than in the previous week, and the latter are the same as in that week.

Deaths attributed to violent causes numbered 33. They are 7 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 58°·5, being 1°·6 below that for the previous week, but 4°·2 above that for the corresponding week of last year. The mean rainfall was 0·45 inch.

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 34.    Week ending SATURDAY, AUGUST 29 1925.    Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 29th August 1925 the births of 1041 living children, the deaths of 554 persons, and 309 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 528. The equivalent annual birth-rate is 22·5 per thousand, the marriage-rate 6·7, and the death-rate corrected 11·4.

The birth-rate for the week is 2·4 above that for the previous week, 1·8 above the mean of the rates for the three preceding weeks, and 0·1 above that for the corresponding week of last year. The marriage-rate for the week is the same as that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, but 0·3 above that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, the same as the mean of the rates for the three preceding weeks, but 0·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 14·3 in Dundee, 14·2 in Kirkcaldy, 14·2 in Hamilton, and 14·1 in Perth, to 2·8 in Kilmarnock, 5·6 in Ayr, and 5·8 in Motherwell and Wishaw. In Glasgow it was 12·0, in Edinburgh 11·7, in Aberdeen 11·5, in Coatbridge 11·5, in Dunfermline 11·2, in Paisley 9·6, in Greenock 9·5, in Falkirk 9·1, and in Clydebank 6·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 46. They are 6 more than in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include 2 from enteric fever, 1 from measles, 3 from scarlet fever, 12 from whooping-cough, 5 from diphtheria, and 23 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 3 more, from enteric fever 2 more, and from diphtheria 2 more, but those from measles and scarlet fever each number the same, while those from the diarrhoeas of childhood are 1 fewer.

Deaths from influenza numbered 3. They are the same as in the previous week, but 1 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 62. They are 22 more than in the previous week, and 10 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 89, and those of persons of sixty-five and upwards 169. The former are 15 more than in the previous week, and the latter are 24 more than in that week.

Deaths attributed to violent causes numbered 29. They are 4 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 57°·1, being 1°·4 below that for the previous week, but 2°·0 above that for the corresponding week of last year. The mean rainfall was 0·61 inch.

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**55. Week ending SATURDAY, SEPTEMBER 5, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 5th September the births of 1034 living children, the deaths of 521 persons, and 432 marriages. The weekly number of deaths corrected by the exclusion of those of residents and by the inclusion of those of residents dying elsewhere in Scotland is 486. The equivalent annual birth-rate is 22·3 per thousand, the marriage-rate 10·3, and the death-rate corrected 10·5.

The birth-rate for the week is 0·2 below that for the previous week, but is 1·0 above the mean of the rates for the three preceding weeks, and 0·9 above that for the corresponding week of last year. The marriage-rate for the week is 2·6 above that for the previous week, and 2·9 above the mean of the rates for the three preceding weeks, but is 0·7 below that for the corresponding week of last year. The death-rate for the week is 0·9 below that for the previous week, 0·9 below the mean of the rates for the three preceding weeks, and 1·0 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·3 in Clydebank, 13·8 in Coatbridge, and 13·2 in Greenock, to 4·2 in Ayr, 6·5 in Motherwell and Wishaw, 5·1 in Kilmarnock. In Falkirk it was 12·1, in Glasgow and in Perth 11·0, in Edinburgh, in Kirkealdy, and in Hamilton 10·3, in Paisley 10·2, in Aberdeen 9·1, in Dundee 8·8, and in Dunfermline 8·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 46. They number the same as in the previous week, and are equivalent to an annual death-rate from these causes of 1·0 per thousand. These deaths were 1 from enteric fever, none from measles, 3 from scarlet fever, 8 from whooping-cough, 9 from diphtheria, and 25 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 4 more, from the diarrhoeas of childhood 2 more, but those from scarlet fever number the same, those from enteric fever and from measles are each 1 fewer, and those from whooping-cough are 4 fewer.

Deaths from influenza numbered 3. They number the same as in the previous week and as the mean of the three preceding weeks.

Deaths from respiratory diseases numbered 60. They are 2 fewer than in the previous week, but 7 more than the mean of the three preceding weeks.

Deaths of children of less than one year old numbered 91, and those of persons twenty-five and upwards 132. The former are 2 more than in the previous week, the latter are 37 fewer than in that week.

Deaths attributed to violent causes numbered 32. They are 3 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 53°·3, 3°·8 below that for the previous week, and 4°·5 below that for the corresponding week of last year. The mean rainfall was 0·26 inch.

*By Authority of the Registrar-General*

---

No. 36. Week ending SATURDAY, SEPTEMBER 12, 1925. Price 2d. net.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 12th September 1925 the births of 934 living children, the deaths of 549 persons, and 388 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 524. The equivalent annual birth-rate is 20·2 per thousand, the marriage-rate 8·4, and the death-rate corrected 11·3.

The birth-rate for the week is 2·1 below that for the previous week, 1·4 below the mean of the rates for the three preceding weeks, and 0·1 below that for the corresponding week of last year. The marriage-rate for the week is 0·9 below that for the previous week, but is 0·8 above the mean of the rates for the three preceding weeks, and 0·2 above that for the corresponding week of last year. The death-rate for the week is 0·8 above that for the previous week, and 0·3 above the mean of the rates for the three preceding weeks, but is 1·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·7 in Falkirk, 13·8 in Aberdeen, and 13·7 in Dundee, to 1·1 in Clydebank, 3·9 in Kirkealdy, and 4·6 in Coatbridge. In Greenock it was 13·2, in Glasgow 11·9, in Edinburgh 11·7, in Ayr 11·3, in Paisley 10·2, in Motherwell and Wishaw 8·7, in Perth 7·8, in Dunfermline 7·5, in Kilmarnock 7·1, and in Hamilton 6·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 34. They are 12 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include 1 from enteric fever, none from measles, 4 from scarlet fever, 8 from whooping-cough, 1 from diphtheria, and 20 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 1 more, but those from enteric fever, from measles and from whooping-cough each number the same, those from the diarrhoeas of childhood are 5 fewer, and those from diphtheria are 8 fewer.

Deaths from influenza numbered 4. They are 1 more than in the previous week, and 1 more than the mean of the numbers for the three preceding weeks.

Deaths from respiratory diseases numbered 78. They are 18 more than in the previous week, and 24 more than the mean of the numbers for the three preceding weeks.

Deaths of children of less than one year old numbered 83, and those of persons of sixty-five and upwards 178. The former are 8 fewer than in the previous week, and the latter are 46 more than in that week.

Deaths attributed to violent causes numbered 19. They are 13 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 50°·7, being 2°·6 below that for the previous week, and 2°·7 below that for the corresponding week of last year. The mean rainfall was 0·99 inch.

**No. 37. Week ending SATURDAY, SEPTEMBER 19, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 19th September 1925 the births of 1034 living children, the deaths of 569 persons, and 369 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 548. The equivalent annual birth-rate is 22·3 per thousand, the marriage-rate 8·0, and the death-rate corrected 11·8.

The birth-rate for the week is 2·1 above that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, and 0·8 above that for the corresponding week of last year. The marriage-rate for the week is 0·4 below that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, and 0·4 below that for the corresponding week of last year. The death-rate for the week is 0·5 above that for the previous week, 0·7 above the mean of the rates for the three preceding weeks, and 0·1 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·1 in Dundee, 14·4 in Aberdeen, and 12·9 in Kirkcaldy, to 6·5 in Motherwell and Wishaw, 6·5 in Clydebank, and 7·6 in Falkirk. In Dunfermline it was 12·5, in Edinburgh 12·2, in Glasgow 12·1, in Kilmarnock 11·4, in Hamilton 10·3, in Greenock 9·5, in Perth 9·4, in Paisley 9·0, in Ayr 8·5, and in Coatbridge 8·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 27. They are 7 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 1 from enteric fever, none from measles, 2 from scarlet fever, 7 from whooping-cough, none from diphtheria, and 17 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 1 fewer, from scarlet fever 2 fewer, and from the diarrhoeas of childhood 3 fewer, while those from enteric fever number the same.

Deaths from influenza numbered 6. They are 2 more than in the previous week, and 3 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 67. They are 11 fewer than in the previous week, and the same as the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 75, and those of persons of sixty-five and upwards 188. The former are 8 fewer than in the previous week, and the latter are 10 more than in that week.

Deaths attributed to violent causes numbered 29. They are 10 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 52°·8, being 2°·1 above that for the previous week, but 0°·5 below that for the corresponding week of last year. The mean rainfall was 1·03 inch.

**No. 38. Week ending SATURDAY, SEPTEMBER 26, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 26th September 1925 the births of 1019 living children, the deaths of 572 persons, and 411 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 544. The equivalent annual birth-rate is 22·0 per thousand, the marriage-rate 8·9, and the death-rate corrected 11·7.

The birth-rate for the week is 0·3 below that for the previous week, and 2·2 below that for the corresponding week of last year, but is 0·4 above the mean of the rates for the three preceding weeks. The marriage-rate for the week is 0·9 above that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, but 1·1 below that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, and 1·1 below that for the corresponding week of last year, but is 0·5 above the mean of the rates for the three preceding weeks.

In the individual towns the death-rate ranged from 16·1 in Coatbridge, 14·5 in Greenock, and 13·7 in Dundee, to 6·2 in Dunfermline, 7·6 in Falkirk, and 7·8 in Kirkcaldy. In Clydebank it was 13·0, in Glasgow 12·2, in Edinburgh 11·6, in Hamilton 11·6, in Aberdeen 11·5, in Perth 11·0, in Paisley 10·2, in Motherwell and Wishaw 8·7, in Kilmarnock 8·5, and in Ayr 8·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 27. They are the same as in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include none from enteric fever, none from measles, 4 from scarlet fever, 2 from whooping-cough, 7 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 7 more, and from scarlet fever 2 more, but those from the diarrhoeas of childhood are 3 fewer, and from whooping-cough 5 fewer.

Deaths from influenza numbered 3. They are 3 fewer than in the previous week, and 1 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 74. They are 7 more than in the previous week, and 6 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 86, and those of persons of sixty-five and upwards 177. The former are 11 more than in the previous week, and the latter are 11 fewer than in that week.

Deaths attributed to violent causes numbered 21. They are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 49°·0, being 3°·8 below that for the previous week, but 0°·8 above that for the corresponding week of last year. The mean rainfall was 0·95 inch.

**No. 39. Week ending SATURDAY, OCTOBER 3 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 3rd October 1925 the births of 967 living children, the deaths of 565 persons, and 511 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 549. The equivalent annual birth-rate is 20·9 per thousand, the marriage-rate 11·0, and the death-rate corrected 11·9.

The birth-rate for the week is 1·1 below that for the previous week, 0·6 below the mean of the rates for the three preceding weeks, and 1·3 below that for the corresponding week of last year. The marriage-rate for the week is 2·1 above that for the previous week, 2·6 above the mean of the rates for the three preceding weeks, and 0·6 above that for the corresponding week of last year. The death-rate for the week is 0·2 above that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, and 0·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 13·8 in Coatbridge, 13·7 in Dundee, and 13·4 in Edinburgh, to 8·5 in Kilmarnock, 8·5 in Ayr and 9·0 in Hamilton. In Kirkcaldy it was 12·9, in Dunfermline 12·5, in Glasgow 11·8, in Aberdeen 11·5, in Perth 11·0, in Clydebank 10·8, in Falkirk 10·6, in Greenock 10·1, in Paisley 9·6, and in Motherwell and Wishaw 9·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 26. They are 1 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include none from enteric fever, none from measles, 5 from scarlet fever, 5 from whooping-cough, 2 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 3 more, and from scarlet fever 1 more, while those from the diarrhoeas of childhood number the same, and those from diphtheria are 5 fewer.

Deaths from influenza numbered 7. They are 4 more than in the previous week, and 3 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 84. They are 10 more than in the previous week, and 11 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 76, and those of persons of sixty-five and upwards 182. The former are 10 fewer than in the previous week, and the latter are 5 more than in that week.

Deaths attributed to violent causes numbered 27. They are 6 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 53°·8, being 4°·8 above that for the previous week, and 1°·8 above that for the corresponding week of last year. The mean rainfall was 0·26 inch.

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 40. Week ending SATURDAY, OCTOBER 10, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 10th October 1925 the births of 1059 living children, the deaths of 587 persons, and 360 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 548. The equivalent annual birth-rate is 22·9 per thousand, the marriage-rate 7·8, and the death-rate corrected 11·8.

The birth-rate for the week is 2·0 above that for the previous week, and 1·2 above the mean of the rates for the three preceding weeks, but 0·6 below that for the corresponding week of last year. The marriage-rate for the week is 3·2 below that for the previous week, and 1·5 below the mean of the rates for the three preceding weeks, but 0·2 above that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, and 0·5 below that for the corresponding week of last year, but the same as the mean of the rates for the three preceding weeks.

In the individual towns the death-rate ranged from 17·7 in Greenock, 15·5 in Ayr, and 15·3 in Edinburgh, to 3·7 in Dunfermline, 3·9 in Kirkcaldy, and 4·6 in Falkirk. In Dundee it was 15·2, in Kilmarnock 12·8, in Glasgow 11·2, in Aberdeen 11·1, in Motherwell and Wishaw 10·2, in Clydebank 9·7, in Hamilton 9·0, in Paisley 8·4, in Perth 7·8, and in Coatbridge 5·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 29. They are 3 more than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include none from enteric fever, 2 from measles, 3 from scarlet fever, 1 from whooping-cough, 9 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 7 more, and from measles 2 more, while those from the diarrhoeas of childhood number the same, and those from scarlet fever are 2 fewer, and from whooping-cough are 4 fewer.

Deaths from influenza numbered 7. They are the same as in the previous week, and 2 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 86. They are 2 more than in the previous week, and 11 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 74, and those of persons of sixty-five and upwards 204. The former are 2 fewer than in the previous week, and the latter are 22 more than in that week.

Deaths attributed to violent causes numbered 20. They are 7 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 51°·3, being 2°·5 below that for the previous week, but 3°·0 above that for the corresponding week of last year. The mean rainfall was 0·02 inch.

**No. 41. Week ending SATURDAY, OCTOBER 17, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 17th October 1925 the births of 1056 living children, the deaths of 562 persons, and 264 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 543. The equivalent annual birth-rate is 22·8 per thousand, the marriage-rate 5·7, and the death-rate corrected 11·7.

The birth-rate for the week is 0·1 below that for the previous week, and 0·2 below that for the corresponding week of last year, but 0·9 above the mean of the rates for the three preceding weeks. The marriage-rate for the week is 2·1 below that for the previous week, 3·5 below the mean of the rates for the three preceding weeks, and 0·3 below that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, and 1·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·1 in Paisley, 13·8 in Motherwell and Wishaw, and 13·2 in Greenock, to 3·2 in Clydebank, 5·2 in Kirkcaldy, and 7·8 in Perth. In Ayr it was 12·7, in Dundee 12·5, in Aberdeen 12·5, in Dunfermline 12·5, in Edinburgh 12·0, in Glasgow 11·8, in Coatbridge 10·4, in Kilmarnock 10·0, in Falkirk 9·1, and in Hamilton 9·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 33. They are 4 more than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include none from enteric fever, 1 from measles, 6 from scarlet fever, 5 from whooping-cough, 9 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 4 more, and from scarlet fever 3 more, while those from diphtheria number the same, and those from measles are 1 fewer, and from the diarrhoeas of childhood 2 fewer.

Deaths from influenza numbered 7. They are the same as in the previous week, but 1 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 92. They are 6 more than in the previous week, and 11 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 87, and those of persons of sixty-five and upwards 175. The former are 13 more than in the previous week, and the latter are 29 fewer than in that week.

Deaths attributed to violent causes numbered 22. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·0, being 8°·3 below that for the previous week, and 6°·1 below that for the corresponding week of last year. The mean rainfall was 0·80 inch.

## WEEKLY RETURN

OF

## Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 42. Week ending SATURDAY, OCTOBER 24, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 24th October 1925 the births of 1051 living children, the deaths of 652 persons, and 257 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 634. The equivalent annual birth-rate is 22·7 per thousand, the marriage-rate 5·6, and the death-rate corrected 13·7.

The birth-rate for the week is 0·1 below that for the previous week, and 0·1 below that for the corresponding week of last year, but is 0·5 above the mean of the rates for the three preceding weeks. The marriage-rate for the week is 0·1 below that for the previous week, 2·6 below the mean of the rates for the three preceding weeks, and 0·5 below that for the corresponding week of last year. The death-rate for the week is 2·0 above that for the previous week, 1·9 above the mean of the rates for the three preceding weeks, and 0·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·5 in Dundee, 16·4 in Greenock, and 14·3 in Edinburgh, to 6·3 in Perth, 6·5 in Clydebank, and 7·0 in Ayr. In Kirkcaldy it was 14·2, in Glasgow 14·1, in Aberdeen 14·1, in Paisley 13·7, in Falkirk 12·1, in Coatbridge 11·5, in Dunfermline 11·2, in Hamilton 9·0, in Motherwell and Wishaw 8·7, and in Kilmarnock 8·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 29. They are 4 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 1 from enteric fever, 2 from measles, 5 from scarlet fever, 5 from whooping-cough, 2 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 2 more, from enteric fever 1 more, and from measles 1 more, but those from whooping-cough number the same, while from scarlet fever they are 1 fewer, and from diphtheria 7 fewer.

Deaths from influenza numbered 7. They are the same as in the previous week, and the same as the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 107. They are 15 more than in the previous week, and 20 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 118, and those of persons of sixty-five and upwards 192. The former are 31 more than in the previous week, and the latter are 17 more than in that week.

Deaths attributed to violent causes numbered 22. They are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 49°·0, being 6°·0 above that for the previous week, and 3°·6 above that for the corresponding week of last year. The mean rainfall was 1·31 inch.

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 43. Week ending SATURDAY, OCTOBER 31, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 31st October 1925 the births of 963 living children, the deaths of 668 persons, and 311 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 646. The equivalent annual birth-rate is 20·8 per thousand, the marriage-rate 6·7, and the death-rate corrected 14·0.

The birth-rate for the week is 1·9 below that for the previous week, 2·0 below the mean of the rates for the three preceding weeks, but 0·2 above that for the corresponding week of last year. The marriage-rate for the week is 1·1 above that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, but the same as that for the corresponding week of last year. The death-rate for the week is 0·3 above that for the previous week, 1·6 above the mean of the rates for the three preceding weeks, and 1·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·8 in Kirkcaldy, 16·4 in Dundee, and 15·5 in Paisley, to 5·6 in Ayr, 6·2 in Dunfermline, and 10·3 in Hamilton. In Glasgow it was 15·4, in Kilmarnock 14·2, in Falkirk 13·7, in Aberdeen 13·4, in Clydebank 13·0, in Motherwell and Wishaw 12·3, in Edinburgh 12·1, in Greenock 12·0, in Coatbridge 11·5, and in Perth 11·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 27. They are 2 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 2 from enteric fever, 4 from measles, 4 from scarlet fever, 3 from whooping-cough, 4 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 2 more, from diphtheria 2 more, and from enteric fever 1 more, but those from scarlet fever are 1 fewer, from whooping-cough 2 fewer, and from the diarrhoeas of childhood 4 fewer.

Deaths from influenza numbered 10. They are 3 more than in the previous week, and 3 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 132. They are 25 more than in the previous week, and 37 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 124, and those of persons of sixty-five and upwards 208. The former are 6 more than in the previous week, and the latter are 16 more than in that week.

Deaths attributed to violent causes numbered 22. They are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 50°·8, being 1°·8 above that for the previous week, and 3°·5 above that for the corresponding week of last year. The mean rainfall was 1·03 inch.

## Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

No. 44. Week ending SATURDAY, NOVEMBER 7, 1925. Price 2d. net.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 7th November 1925 the births of 958 living children, the deaths of 647 persons, and 388 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 605. The equivalent annual birth-rate is 20·7 per thousand, the marriage-rate 8·4, and the death-rate corrected 13·1.

The birth-rate for the week is 0·1 below that for the previous week, 1·4 below the mean of the rates for the three preceding weeks, and 0·8 below that for the corresponding week of last year. The marriage-rate for the week is 1·7 above that for the previous week, 2·4 above the mean of the rates for the three preceding weeks, and the same as that for the corresponding week of last year. The death-rate for the week is 0·9 below that for the previous week, the same as the mean of the rates for the three preceding weeks, and 1·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·1 in Paisley, 15·5 in Dundee, 15·5 in Hamilton, and 14·6 in Glasgow, to 6·1 in Falkirk, 8·5 in Kilmarnock, and 8·6 in Clydebank. In Perth it was 12·5, in Edinburgh 12·2, in Motherwell and Wishaw 11·6, in Coatbridge 11·5, in Dunfermline 11·2, in Kirkcaldy 10·3, in Ayr 9·9, in Aberdeen 9·8, and in Greenock 8·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 23. They are 4 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·5 per thousand. These deaths include none from enteric fever, 1 from measles, 4 from scarlet fever, 3 from whooping-cough, 9 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 5 more, but those from scarlet fever and whooping-cough each number the same, while from measles they are 3 fewer, and from the diarrhoeas of childhood 4 fewer.

Deaths from influenza numbered 8. They are 2 fewer than in the previous week, but the same as the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 130. They are 2 fewer than in the previous week, but 20 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 130, and those of persons of sixty-five and upwards 187. The former are 6 more than in the previous week, and the latter are 21 fewer than in that week.

Deaths attributed to violent causes numbered 22. They are the same as in the previous week.

The mean temperature for seven of the towns named in the Table was 45°·6, being 5°·2 below that for the previous week, but 2°·9 above that for the corresponding week of last year. The mean rainfall was 0·43 inch.

**No. 45. Week ending SATURDAY, NOVEMBER 14, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 14th November 1925 the births of 1021 living children, the deaths of 693 persons, and 267 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 691. The equivalent annual birth-rate is 22·0 per thousand, the marriage-rate 5·8, and the death-rate corrected 14·9.

The birth-rate for the week is 1·3 above that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, but 1·7 below that for the corresponding week of last year. The marriage-rate for the week is 2·6 below that for the previous week, and 1·1 below the mean of the rates for the three preceding weeks, but 0·2 above that for the corresponding week of last year. The death-rate for the week is 1·8 above that for the previous week, and 1·3 above the mean of the rates for the three preceding weeks, but 1·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·8 in Greenock, 19·1 in Paisley, and 18·8 in Perth, to 5·2 in Hamilton, 7·0 in Ayr, and 7·8 in Kirkcaldy. In Dundee it was 17·6, in Glasgow 15·7, in Edinburgh 15·5, in Falkirk 15·2, in Motherwell and Wishaw 13·1, in Coatbridge 12·7, in Aberdeen 10·5, in Dunfermline 10·0, in Kilmarnock 10·0, and in Clydebank 9·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 37. They are 14 more than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include none from enteric fever, 5 from measles, 7 from scarlet fever, 5 from whooping-cough, 13 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 4 more, from diphtheria 4 more, from scarlet fever 3 more, from whooping-cough 2 more, and from the diarrhoeas of childhood 1 more.

Deaths from influenza numbered 11. They are 3 more than in the previous week, and 3 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 145. They are 15 more than in the previous week, and 22 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 129, and those of persons of sixty-five and upwards 206. The former are 1 fewer than in the previous week, and the latter are 19 more than in that week.

Deaths attributed to violent causes numbered 26. They are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 35°·6, being 10°·0 below that for the previous week, and 7°·1 below that for the corresponding week of last year. The mean rainfall was 0·07 inch.

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

No. 46. Week ending SATURDAY, NOVEMBER 21, 1925. Price 2d. net.

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 21st November 1925 the births of 981 living children, the deaths of 780 persons, and 216 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 748. The equivalent annual birth-rate is 21·2 per thousand, the marriage-rate 4·7, and the death-rate corrected 16·2.

The birth-rate for the week is 0·8 below that for the previous week, the same as the mean of the rates for the three preceding weeks, and 0·8 below that for the corresponding week of last year. The marriage-rate for the week is 1·1 below that for the previous week, 2·3 below the mean of the rates for the three preceding weeks, and 0·6 below that for the corresponding week of last year. The death-rate for the week is 1·3 above that for the previous week, 2·2 above the mean of the rates for the three preceding weeks, but 0·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 24·3 in Falkirk, 18·5 in Glasgow, and 16·8 in Kirkcaldy, to 8·7 in Motherwell and Wishaw, 8·8 in Greenock, and 9·0 in Hamilton. In Dundee it was 16·7, in Aberdeen 16·7, in Clydebank 16·2, in Perth 15·6, in Ayr 15·5, in Edinburgh 14·8, in Paisley 13·7, in Kilmarnock 11·4, in Dunfermline 10·0, and in Coatbridge 9·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 36. They are 1 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include none from enteric fever, 11 from measles, 4 from scarlet fever, 4 from whooping-cough, 6 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 6 more, and from the diarrhoeas of childhood 4 more, but those from whooping-cough are 1 fewer, from scarlet fever 3 fewer, and from diphtheria 7 fewer.

Deaths from influenza numbered 8. They are 3 fewer than in the previous week, and 2 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 189. They are 44 more than in the previous week, and 53 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 141, and those of persons of sixty-five and upwards 240. The former are 12 more than in the previous week, and the latter are 34 more than in that week.

Deaths attributed to violent causes numbered 11. They are 15 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 36°·0, being 0°·4 above that for the previous week, but 8°·5 below that for the corresponding week of last year. The mean rainfall was 0·14 inch.

# WEEKLY RETURN

OF

# Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 47. Week ending SATURDAY, NOVEMBER 28, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 28th November 1925 the births of 1027 living children, the deaths of 891 persons, and 287 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 866. The equivalent annual birth-rate is 22·2 per thousand, the marriage-rate 6·2, and the death-rate corrected 18·7.

The birth-rate for the week is 1·0 above that for the previous week, 0·9 above the mean of the rates for the three preceding weeks, and 0·6 above that for the corresponding week of last year. The marriage-rate for the week is 1·5 above that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, and 0·3 above that for the corresponding week of last year. The death-rate for the week is 2·5 above that for the previous week, 4·0 above the mean of the rates for the three preceding weeks, and 2·1 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·9 in Perth, 21·7 in Glasgow, and 21·2 in Falkirk, to 7·6 in Clydebank, 8·7 in Dunfermline, and 13·1 in Motherwell and Wishaw. In Dundee it was 18·5, in Paisley 17·9, in Edinburgh 17·4, in Hamilton 16·8, in Aberdeen 16·1, in Coatbridge 16·1, in Kilmarnock 15·6, in Ayr 15·5, in Greenock 15·1, and in Kirkcaldy 14·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 45. They are 9 more than in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include 2 from enteric fever, 17 from measles, 4 from scarlet fever, 6 from whooping-cough, 5 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 6 more, from enteric fever 2 more, and from whooping-cough 2 more, while from scarlet fever and the diarrhoeas of childhood they number the same, and from diphtheria they are 1 fewer.

Deaths from influenza numbered 20. They are 12 more than in the previous week, and 11 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 247. They are 58 more than in the previous week, and 92 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 124, and those of persons of sixty-five and upwards 308. The former are 17 fewer than in the previous week, and the latter are 68 more than in that week.

Deaths attributed to violent causes numbered 21. They are 10 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 35°·8, being 0°·2 below that for the previous week, and 10°·6 below that for the corresponding week of last year. The mean rainfall was 0·17 inch.

## Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 48. Week ending SATURDAY, DECEMBER 5, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 5th December 1925 the births of 989 living children, the deaths of 933 persons, and 330 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 896. The equivalent annual birth-rate is 21·4 per thousand, the marriage-rate 7·1, and the death-rate corrected 19·3.

The birth-rate for the week is 0·8 below that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, but 1·0 above that for the corresponding week of last year. The marriage-rate for the week is 0·9 above that for the previous week, 1·5 above the mean of the rates for the three preceding weeks, but 0·1 below that for the corresponding week of last year. The death-rate for the week is 0·6 above that for the previous week, 2·7 above the mean of the rates for the three preceding weeks, and 3·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 24·2 in Coatbridge, 23·5 in Perth, and 22·4 in Dunfermline, to 8·0 in Motherwell and Wishaw, 11·3 in Ayr, and 11·6 in Kirkcaldy. In Glasgow it was 21·7, in Dundee 21·6, in Falkirk 19·7, in Aberdeen 18·7, in Paisley 18·5, in Hamilton 18·1, in Edinburgh 17·8, in Kilmarnock 17·1, in Greenock 12·6, and in Clydebank 11·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 49. They are 4 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include none from enteric fever, 13 from measles, 4 from scarlet fever, 8 from whooping-cough, 14 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 9 more, and from whooping-cough 2 more, while those from scarlet fever number the same, and those from the diarrhoeas of childhood are 1 fewer, and from measles 4 fewer.

Deaths from influenza numbered 17. They are 3 fewer than in the previous week, but 4 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 288. They are 41 more than in the previous week, and 94 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 144, and those of persons of sixty-five and upwards 330. The former are 20 more than in the previous week, and the latter are 22 more than in that week.

Deaths attributed to violent causes numbered 28. They are 7 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 33°·8, being 2°·0 below that for the previous week, and 11°·3 below that for the corresponding week of last year. The mean rainfall was 0·29 inch.

## WEEKLY RETURN

OF

## Births, Deaths, and Marriages

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General***No. 49. Week ending SATURDAY, DECEMBER 12, 1925. Price 2d. net.**

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 12th December 1925 the births of 1031 living children, the deaths of 993 persons, and 272 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 954. The equivalent annual birth-rate is 22·3 per thousand, the marriage-rate 5·9, and the death-rate corrected 20·6.

The birth-rate for the week is 0·9 above that for the previous week, 0·7 above the mean of the rates for the three preceding weeks, and 0·5 above that for the corresponding week of last year. The marriage-rate for the week is 1·2 below that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, but 0·1 above that for the corresponding week of last year. The death-rate for the week is 1·3 above that for the previous week, 2·5 above the mean of the rates for the three preceding weeks, and 4·6 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 28·5 in Kilmarnock, 28·2 in Perth, and 27·5 in Paisley, to 9·2 in Coatbridge, 10·2 in Motherwell and Wishaw, and 16·2 in Clydebank. In Ayr it was 23·9, in Glasgow 22·4, in Edinburgh 19·9, in Hamilton 19·4, in Dundee 19·1, in Greenock 18·3, in Aberdeen 17·7, in Dunfermline 17·4, in Kirkcaldy 16·8, and in Falkirk 16·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 43. They are 6 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·9 per thousand. These deaths include 1 from enteric fever, 10 from measles, 3 from scarlet fever, 10 from whooping-cough, 7 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough and from the diarrhoeas of childhood are each 2 more, and from enteric fever 1 more, while those from scarlet fever are 1 fewer, from measles 3 fewer, and from diphtheria 7 fewer.

Deaths from influenza numbered 26. They are 9 more than in the previous week, and 11 more than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 317. They are 29 more than in the previous week, and 76 more than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 138, and those of persons of sixty-five and upwards 359. The former are 6 fewer than in the previous week, and the latter are 29 more than in that week.

Deaths attributed to violent causes numbered 40. They are 12 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 38°·9, being 5°·1 above that for the previous week, but 8°·4 below that for the corresponding week of last year. The mean rainfall was 0·74 inch.

## Principal Towns of Scotland

*By Authority of the Registrar-General*

**No. 50. Week ending SATURDAY, DECEMBER 19, 1925. Price 2d. net.**

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 19th December 1925 the births of 1023 living children, the deaths of 883 persons, and 266 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 847. The equivalent annual birth-rate is 22·1 per thousand, the marriage-rate 5·7, and the death-rate corrected 18·3.

The birth-rate for the week is 0·2 below that for the previous week, 0·1 above the mean of the rates for the three preceding weeks, and 1·8 above that for the corresponding week of last year. The marriage-rate for the week is 0·2 below that for the previous week, 0·7 below the mean of the rates for the three preceding weeks, and 0·1 below that for the corresponding week of last year. The death-rate for the week is 2·3 below that for the previous week, 1·2 below the mean of the rates for the three preceding weeks, but 2·1 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·9 in Dundee, 21·3 in Kilmarnock, and 20·0 in Glasgow, to 9·0 in Paisley, 10·3 in Hamilton, and 10·9 in Motherwell and Wishaw. In Edinburgh it was 19·9, in Perth 17·2, in Falkirk 16·7, in Dunfermline 16·2, in Coatbridge 16·1, in Kirkcaldy 15·5, in Aberdeen and in Clydebank 15·1, in Ayr 14·1, and in Greenock 13·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 53. They are 10 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include none from enteric fever, 19 from measles, 4 from scarlet fever, 6 from whooping-cough, 15 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 9 more, from diphtheria 8 more, and from scarlet fever 1 more, but those from the diarrhoeas of childhood are 3 fewer, and from whooping-cough 4 fewer.

Deaths from influenza numbered 17. They are 9 fewer than in the previous week, and 4 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 254. They are 63 fewer than in the previous week, and 30 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 132, and those of persons of sixty-five and upwards 294. The former are 6 fewer than in the previous week, and the latter are 65 fewer than in that week.

Deaths attributed to violent causes numbered 27. They are 13 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 35°·0, being 3°·9 below that for the previous week, and 9°·7 below that for the corresponding week of last year. The mean rainfall was 0·85 inch.

IN THE

## Principal Towns of Scotland

*By Authority of the Registrar-General*

---

**No. 51. Week ending SATURDAY, DECEMBER 26, 1925. Price 2d. net.**

---

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 26th December 1925 the births of 921 living children, the deaths of 800 persons, and 384 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 766. The equivalent annual birth-rate is 19·9 per thousand, the marriage-rate 8·3, and the death-rate corrected 16·5.

The birth-rate for the week is 2·2 below that for the previous week, and 2·0 below the mean of the rates for the three preceding weeks, but 1·0 above that for the corresponding week of last year. The marriage-rate for the week is 2·6 above that for the previous week, and 2·1 above the mean of the rates for the three preceding weeks, but 1·9 below that for the corresponding week of last year. The death-rate for the week is 1·8 below that for the previous week, and 2·9 below the mean of the rates for the three preceding weeks, but 0·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 24·2 in Coatbridge, 20·3 in Perth, and 19·6 in Greenock, to 7·5 in Dunfermline, 8·5 in Kilmarnock, and 9·0 in Hamilton. In Glasgow it was 18·7, in Dundee 18·5, in Kirkcaldy 18·1, in Ayr 16·9, in Paisley 14·3, in Clydebank 14·1, in Aberdeen 13·8, in Edinburgh 13·7, in Motherwell and Wishaw 12·3, and in Falkirk 12·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 46. They are 7 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include none from enteric fever, 13 from measles, 7 from scarlet fever, 10 from whooping-cough, 8 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 4 more, and from scarlet fever 3 more, but those from the diarrhoeas of childhood are 1 fewer, from measles 6 fewer, and from diphtheria 7 fewer.

Deaths from influenza numbered 9. They are 8 fewer than in the previous week, and 11 fewer than the mean of those of the three preceding weeks.

Deaths from respiratory diseases numbered 203. They are 51 fewer than in the previous week, and 83 fewer than the mean of those of the three preceding weeks.

Deaths of children of less than one year old numbered 113, and those of persons of sixty-five and upwards 271. The former are 19 fewer than in the previous week, and the latter are 23 fewer than in that week.

Deaths attributed to violent causes numbered 26. They are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 30°·6, being 3°·9 below that for the previous week, and 13°·7 below that for the corresponding week of last year. The mean rainfall was 0·74 inch.

Note:—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which influenza was a contributory cause as well as those of which it was the sole cause.  
\* Cerebro-spinal meningitis.

WEEKLY RETURN  
OF  
**Births, Deaths, and Marriages**  
IN THE  
**Principal Towns of Scotland**

*By Authority of the Registrar-General*

**No. 52. Week ending SATURDAY, JANUARY 2, 1926. Price 2d. net.**

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,414,500, there were registered during the week ending 2nd January 1926 the births of 1065 living children, the deaths of 873 persons, and 957 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 832. The equivalent annual birth-rate is 23·0 per thousand, the marriage-rate 20·7, and the death-rate corrected 18·0.

The birth-rate for the week is 3·1 above that for the previous week, 1·6 above the mean of the rates for the three preceding weeks, and 3·1 above that for the corresponding week of last year. The marriage-rate for the week is 12·4 above that for the previous week, 14·1 above the mean of the rates for the three preceding weeks, but 8·8 below that for the corresponding week of last year. The death-rate for the week is 1·5 above that for the previous week, and 0·5 below the mean of the rates for the three preceding weeks, but 1·0 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 25·0 in Perth, 19·3 in Glasgow, and 19·1 in Dundee, to 11·6 in Hamilton, 12·3 in Motherwell and Wishaw, and 13·0 in Clydebank. In Edinburgh it was 18·8, in Dunfermline 18·7, in Coatbridge 18·5, in Falkirk 18·2, in Greenock 17·0, in Kilmarnock 15·6, in Aberdeen 14·7, in Kirkcaldy 14·2, in Ayr 14·1, and in Paisley 13·7.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 46. They number the same as in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include none from enteric fever, 17 from measles, 4 from scarlet fever, 9 from whooping-cough, 8 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 4 more, but those from diphtheria and from the diarrhoeas of childhood each number the same, those from whooping-cough are 1 fewer, and those from scarlet fever are 3 fewer.

Deaths from influenza numbered 9. They number the same as in the previous week, but are 8 fewer than the mean of the numbers for the three preceding weeks.

Deaths from respiratory diseases numbered 175. They are 28 fewer than in the previous week, and 83 fewer than the mean of the numbers for the three preceding weeks.

Deaths of children of less than one year old numbered 103, and those of persons of sixty-five and upwards 312. The former are 10 fewer than in the previous week, but the latter are 41 more than in that week.

Deaths attributed to violent causes numbered 28. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·6, being 10°·0 above that for the previous week, and 0°·8 above that for the corresponding week of last year. The mean rainfall was 1·16 inch.
